MASON'S FARRIER—FARMERS' EDITION.

Price, 62 cents.

THE PRACTICAL FARRIER, FOR FARMERS:

COMPRISING A GENERAL DESCRIPTION OF THE NOBLE AND USEFUL ANIMAL

THE HORSE;

WITH MODES OF MANAGEMENT IN ALL CASES, AND TREATMENT IN DISEASE.

TO WHICH IS ADDED,

A PRIZE ESSAY ON MULES; AND AN APPENDIX,

Containing Recipes for Diseases of Horses, Cows, Cattle, Sheep, Dogs, Swine, &c. &c.

BY RICHARD MASON, M.D.,

Formerly of Narvy County, Virginia.

In one volume, 12mo.; bound in cloth, gilt.

MASON'S FARRIER AND STUD-BOOK—NEW EDITION.

THE GENTLEMAN'S NEW POCKET FARRIER:

COMPRISING A GENERAL DESCRIPTION OF THE NOBLE AND USEFUL ANIMAL,

THE HORSE;

WITH MODES OF MANAGEMENT IN ALL CASES, AND TREATMENT IN DISEASE.

BY RICHARD MASON, M.D.,

Formerly of Narvy County, Virginia.

To which is added, A PRIZE ESSAY ON MULES; and AN APPENDIX, containing Recipes for

Diseases of Horses, Cows, Cattle, Sheep, Dogs, Swine, &c. &c.; with Annals

WITH A SUPPLEMENT,

Comprising an Essay on Domestic Animals, especially the Horse; with Remarks on Treatment and Breeding; together with Trotting and Racing Tables, showing the best time on record at one,

Two, three and four mile heats; Pedigrees of Winning Horses, since 1839; and of the most

celebrated Stallions and Mares; with useful Calving and Lambing Tables. By

J. S. SKINNER, Editor now of the Farmer's Library, New York, &c. &c.

1853.
Entered according to Act of Congress, in the year 1853, by

C. B. ROGERS,

in the Clerk's Office of the District Court of the Eastern District of Pennsylvania.
At the request of Mr. John Nefflin, author of the present treatise, a Committee was appointed by the Philadelphia Society for the Promotion of Agriculture, for the purpose of testing the truth of Guenon's system, as simplified and arranged by Mr. Nefflin. The mode of investigation pursued by the Committee is detailed in the following report, which, by an extract from the proceedings of the Society given below, it will be seen was unanimously adopted.

REPORT

Of the Committee appointed to investigate the merits of Mr. John Nefflin's simplification of Guenon's method of testing the value of milk cows.

The Committee to whom was intrusted the examination of Guenon's system, very respectfully offer the result of their proceedings.

As the subject is one of great practical importance to the farmer, and no confidence in it can be created by vague generalities or isolated assertions on the part of those who may have given to it some attention, the Committee have endeavoured by personal observation to verify the published statements. The fortunate arrival in this country of a German farmer, Mr. Nefflin, has offered a most happy opportunity of developing the nature and character of Guenon's observations, and the mode in which an adept in the science proceeds in his examinations. More than forty cows were examined by this gentleman in the presence of members of the Committee. All the remarks of Mr.
Nefflin, all the questions and answers, were taken down at the moment by Mr. Arthur Cannon, phonographic reporter; and all his statements were compared with those of the owners of the cows. In this form and in this critical mode of proceeding, the Committee thought it possible to remove every doubt they themselves or others might feel in the truth of the system, and be enabled to offer to the Society and the agricultural community a clear and truthful history of this interesting discovery. After a full and particular investigation, carried on in the most searching manner, and sharpened by incredulity, the Committee have no hesitation in giving their adhesion, and expressing their concurrence in the views of Guenon. The precision and accuracy with which Mr. Nefflin describes the qualities of the animals, and the unhesitating manner in which he revealed all their properties, could not but impress the Committee with an entire reliance on his own skill, and a perfect confidence in the views of his teacher.

Still, though the Committee have no hesitation in offering this opinion, as the matter is one of the utmost importance, they deem it proper to recommend that if there remain any doubt on the part of the Society, as to the clear and complete demonstration of the truth of Guenon's observations, or if there are individual members who hesitate to concede the point, that the examinations should be continued until all scepticism, as far as possible, be removed.

A. L. Elwyn,
George Blight,
Isaac Newton,
John Wilkinson,
Samuel Williams,
Samuel C. Ford.
The following certificates from Messrs. Ford and Wilkinson, whose cows were examined by Mr. Nefflin, are presented for the purpose of conveying to the reader a clear idea of the method of examination, and of removing any doubts that might exist in regard to the practical application of the theory by every farmer. When it is remembered that Mr. Nefflin had no prior knowledge of the character of the cows submitted to his inspection (being an entire stranger in the vicinity of Philadelphia), these testimonies from gentlemen of the highest respectability, furnish most conclusive evidence of the value of the discovery, and should at once commend it to the earnest attention of the agricultural community generally.

**MR. FORD'S STOCK.**

1st Cow. "Is a bastard of the 3d class, 2d order, and is an excellently made cow; her milk is very rich, of which she will yield 16 qts., but she dries suddenly after becoming pregnant."

I certify the above is a correct report of the qualities of the above cow.

_Samuel C. Ford._

2d Cow. "Is a bastard of the 3d class, 2d order, and has no mark; will calve about the 1st of March, a month prior to which time, she will suddenly decrease in her yield of milk; when not in a state of pregnancy is a good milch cow."

The same as regards this cow.

_Samuel C. Ford._

3d Cow. "Is of the 4th class, 2d order; the escutcheon of the fork shape, though not so perfect as it ought to be; will give 15 or 16 qts. of milk; about 5 or 6
weeks after calving her yield is most plentiful; her milk is very good."

Correct in every respect.  

Samuel C. Ford.

MR. WILKINSON'S COWS.

No. 1. "Belongs to the 2d class, and 2d order, and will yield 16 to 18 qts. per day. She has not the two oval marks distinct, or she would rank first class. She will hold her milk up to the time of calving.

No. 2. "Belongs to the 2d order, and 1st class, and would, if she was as large as No. 1, give 20 qts. of milk per diem, but as it is, should give 15 or 16 qts.

No. 3. "Belongs to the 2d class and 3d order." The examiner here remarked that he supposed that Mr. W. had been near 20 years in getting his herd to such perfection, to which Mr. W. replied that he had not owned a cow in his dairy more than 2 years and 3 months, but that he had selected them on this system.

It is due to Mr. Wilkinson to say that the examiner, after he had examined all his cows, acknowledged that in all his long experience with cows, he had not in his whole life seen so large a number of such highly marked cows in any herd, as he found in Mr. W.'s herd of S. Many other facts which must have been highly gratifying to Mr. W. were mentioned, but are necessarily omitted.

CERTIFICATE OF MR. WILKINSON.

The description given of my cows by Mr. Nefflin, after he examined them by his improved Guenon system, is in the main very correct, and satisfies me that this is the only reliable system by which cows can be selected.

John Wilkinson,
Mount Airy Agr'l. Institute, Germantown, Pa.
PREFACE.

In this small volume I offer to the American farmer a discovery, which, if carefully applied in the breeding of cattle, will be of great importance and of incalculable benefit to him. It will enable him to double, nay, in six or eight years to treble, the yield of his cows without increasing their number, bettering their food, or adding to their expenditure. It teaches the cattle-breeder the most infallible signs of a greater or smaller productiveness for the dairy; signs, which may be perceived in a calf not more than three months old. They indicate not only the quantity but also the duration of the yield, that is to say, they show how many quarts of milk a cow, when well fed, will give after calving, and how long this yield of milk will last or how soon the cow will go dry. The advantages which will accrue to the cattle-breeder from the knowledge of such signs are many. It will not only enable him to raise his stock to the greatest productiveness, but to sustain this productiveness at its greatest height. He will know what animals to purchase, what calves to select for breeding and which for fattening. This discovery is new in France and in the south of Germany, and but little known, as no popular pen has undertaken to place it within reach of the farming population in
a clear and comprehensible manner. So far, no farmer has been found, who, equally capable of managing the plough and the pen, has tried to introduce order and system into the large number of illustrations and degrees of productiveness which Guenon has described singly, and to separate the many superfluous descriptions of the numerous varieties from those which are actually necessary; still less has any one taken the pains of testing and verifying the theory of Guenon by profound study, years of experiments and observations. In every other country, and consequently in the United States, this discovery is still entirely unknown.

The present pages, the first which vouch for the correctness of this important and very profitable discovery, and which make it generally known, will prove what has been advanced above. The author moreover is prepared to establish its truth beyond all manner of doubt, by indicating the quantity and the duration of the yield of every cow, on examining any stock of cattle.

Here, I do not deem it superfluous to explain to the reader how far I am qualified to treat of this subject.

As early as 1815, I became possessed of a farm in the best and most fertile part of Wurtemberg. I devoted myself to an extensive system of agriculture, embracing the cultivation of the vine and of orchards. By degrees I commenced to raise several kinds of grain and plants of commerce, such as hops, madder, teazel, poppy, and millet, in which I was very successful. I also established a whiskey distillery, which produced fifteen gallons per diem, with which I connected a vinegar distillery. But my most successful undertaking was my cheese-dairy, which I commenced
in 1817; it consumed daily from 1500 to 1600 quarts of milk, partly the produce of my own cows, partly that of the establishments of my neighbours.

In the same year I became justice of the peace of the community of Pleidelsheim on the Neckar, in which office I continued for twenty-seven years, after which I resigned, with the intention of devoting my time, as I flattered myself, to a more quiet occupation, that of publishing a periodical and of carrying on farming on an extensive scale.

In the year 1823, the superiority of my farm was acknowledged by the government. I received a gold prize-medal and 20 ducats. Soon after I received the diploma as member of the Wurtemberg Agricultural Society, also that of the Baden Agricultural Society, and a year later, I was appointed President of the Agricultural Society of the Circle (District) of the Neckar. Elected representative for the assembly of the states in 1831, I was appointed on the committee of agriculture, and on that for the diminution of feudal taxes and tithes. In this capacity, and as editor of the "Field and Garden Gazette," I joined the opposition, and continued with the party, until on the 1st October, 1848, by a speech in the popular assembly at Heilbronn, the text of which I had taken from the Bible, and had changed to suit the times, "Render to Caesar the things that are Caesar's, to the people the things that are the people's, and what remains to the king," I had attracted the favourable notice of the government, which had become reactionary, to such a degree that they contemplated appointing me for a couple of years to a government situation in one of their prisons; but which, having been early apprised of their kind intentions towards me, I evaded by sudden flight.
In confirmation of the above facts, I hold in my hands printed and written certificates; but the most authentic testimonial will be found in Brockhaus's Conversational Lexicon of 1834, vol. 14, page 1004.

I do not refer to these testimonials of my agricultural and political career to gratify any feelings of vanity; but I do so as a duty towards the reader, to convince him that this volume does not contain any theoretical humbug, but thorough practical experiments and verified results.

I now offer this little work to the farmer, firmly convinced that sooner or later, if he applies the system contained therein, I shall be rewarded by his acknowledging that I have rendered him an essential service.

The Author.

*Philadelphia, October, 1852.*
INTRODUCTION.

François Guenon was the son of poor parents in Libourne in France. Early left an orphan, he obtained employment as cowherd with a rich farmer. His vocation employed but little of his time, but instead of wasting it in idleness, he tried to occupy his mind by observing and comparing what was passing around him. Thus he had become acquainted with all the peculiarities, virtues, and vices of the animals intrusted to his care, according to their colour and the smallest marks of distinction; he soon know how much milk each of his cows gave, and how long they continued to give it, and was enabled to number and classify the animals according to their worth; but this was not sufficient for Guenon, he wanted to read their internal good qualities, on the outside. He was acquainted with the external milk-marks, but these, he found, did not always agree with the productiveness, seldom with the duration of the yield; consequently he continued his researches, and for this purpose selected the best cow and the worst. Thus he found the most general sign in the region between the two hind-legs from the udder upwards to the exterior of the female organs of generation. He now continued his researches and comparisons, and became daily more convinced that
INTRODUCTION.

here only the infallible signs of the yield of milk could be found.

Having stored his memory with a considerable number of well tested observations, and saved a sufficient amount from his wages to buy a single cow, he resigned his situation as cowherd, and commenced trading in cattle with one good cow.

As he brought none but good milkers into the market, and always gave satisfaction to purchasers, his reputation soon increased, as well as his profits, and he was enabled to make his purchases in distant parts.

During this time, his knowledge of the milk-marks became so much extended and confirmed, that he was enabled, though little accustomed to the use of the pen, to publish his experience in 216 parts, accompanied by 372 illustrations. The Agricultural Societies of Bordeaux and of Aurillac honourably acknowledged his merits.

In the year 1838, the publication of Guenon first fell into my hands. I translated it into German, and, assisted by the manuscript and the illustrations, I, together with several other able agriculturists of the neighbourhood, entered upon the testing of the theory of Guenon. This undertaking, however, was very difficult and very fatiguing, because Guenon had arranged his experiments according to the quantity of milk given by the cows, and had described each milkmark separately, instead of arranging them in classes and omitting the marks of bad milkers.

This defect induced me, after ten years of trial and of experiments, to arrange the discovery of Guenon, without any essential alteration, into a system of classes and orders, more simple, more comprehensible, and more convenient for use.
INTRODUCTION.

Guenon called the above described region, by which the greater or smaller productiveness of the animal can be ascertained, by the significant name of "milk-mirror," and a more appropriate appellation he could not have selected, as by the signs here impressed we can observe, as in a mirror, the hidden inward quantity of milk.

This milk-mirror is more perceptible during the summer than during the winter season, both in old and in young animals; the reason of this is that the hairs are finer and shorter, whilst the animals are fed on green fodder, particularly when they are kept very clean.

The hair of the horned cattle, as is well known, grows downwards, only in the milk-mirror, which (as we have said before), begins at the udder, the down-like, delicate, short, and lighter-coloured hair grows upwards; and where the ascending and descending hair meet, they form an elevated stripe, a vortex or whirl. This whirl is the real frame or border of the milk-mirror, and gives it its shape. This shape is the principal mark of the productiveness of the cow. One shape, when perfect, shows a greater abundance of milk than another; all of them may be divided into eight classes. In each class there are again varieties in the form of the mirror, as soon as propagation is allowed among animals of different classes, or with such as have irregular mirrors. This, in fact, is the cause of so many alterations in the mirror, and in the degrees of the productiveness down to the lowest quantity. The nearer an animal approaches the first order of its class, the less the milk-mirror deviates from the form of the class in its purity, and the less the productiveness diminishes. Thus each class has been divided into eight orders, to
exhibit its modification in the form and consequent smaller productiveness.

Finally, we have to notice the important circumstance, that the male animals have the same milk-mirror as the female animals, only somewhat smaller; and that, if we wish to keep the stock pure, we should select the bull from the same class as the cow, and if possible from the first, second, or third order. When we have bulls of the first order, the breed may be gradually improved, until we raise the female animals to the first order of their class.

This will suffice to show how immense are the advantages which result from the discovery of Guenon for the farmer or for the cattle-keeper in general. In the following pages, the method of obtaining and of improving these advantages will be explained. To obtain this object, we need in the beginning, until a thorough knowledge has been acquired, nothing but some attention and a little patience, two qualities with which the farmer must be born, and which he must cultivate, if he wishes to be successful in his business.

If the reader, notwithstanding the clearness with which the author has tried to explain himself in the following pages, should find doubts and difficulties, he is requested to apply either in person or by letter to the publishers, when the author will consider it a pleasure to answer any inquiries that may be made.

John Nefflen.
PRODUCTIVENESS OF THE COW.

Heretofore the opinion of graziers and breeders of cattle has been that the productiveness of the cow depended upon certain breeds, and that, to increase the quantity of milk obtained, it was necessary to procure a certain breed famous as being good milkers. Farmers, therefore, frequently procured such a breed from a great distance and at considerable expense, without examining into the productiveness of the cattle, this being taken for granted, but looking principally to obtain young, fleshy, and well formed cattle: but only too frequently the purchaser was disappointed in his expectations. Perhaps the change of the climate, and the feed, diminished the quantity of the milk yielded before; but certainly the ignorance of a necessary correspondence between the milk-mirror of the male and female, must have contributed most to this decrease in the production of the milk.

The above assertion has been incontrovertibly estab-
lished by the discovery of Guenon, though cattle-dealers prefer to sell the well formed fleshy cattle at a high price, and keep the good milkers for their own families. It has therefore frequently happened that large farmers or agricultural societies, to increase the productiveness of their dairy, have sacrificed, nay, to tell the truth, have thrown away large sums of money for some famous breed; but still greater was the mistake, when, to obtain the object sought for, only fine bulls of a celebrated breed were procured. It must be admitted that in purchasing these, the increase of the production of the dairy was not the only object, for the advantages obtained by the rearing of cattle are threefold. The first consists in the profits of the dairy, the second in procuring durable draught animals, and the third in the rapid fattening of the cattle. Each of these objects may be more easily obtained with one breed than with another; but we must not imagine, that, where the principal advantage aimed at in the rearing of cattle is the increased production of the dairy, the other advantages become unattainable. For in every breed peculiarly adapted for draught and for fattening, there are excellent milkers, and their productiveness may not only be kept up, but may be increased, when we succeed in effecting the propagation by male and female animals, which have the same milk-mirror, or which belong to the same class and the same order.
PRODUCTIVENESS OF THE COW. 17

This assertion, verified by a number of experiments, is the solid basis of the discoveries and doctrines of Guenon. It is true every rule has its exceptions, but when nature now and then deviates from her path, we should not hastily seek the cause in a defect of order, or attribute it to a mistaken experience and to deception.

It is a practically established fact, that defective feed, want of proper care, accidental diseases, but principally inflammation of the udder (Garget), and premature calving, interfere with the development of their productiveness for the dairy, interrupt the same if already established, and make its restoration impossible. Therefore such exceptions, the cause of which has never been properly examined, cannot overturn the well tested theory, that nature everywhere and at all times pursues her regular course, unless driven from it by some powerful obstacle and superior influence.

Guenon also had asserted, and the observations and experiments based upon his doctrines have proved beyond the power of contradiction, that the productiveness does not belong to any single breed of cattle, that in every breed we can find good milkers, and that consequently without detriment to the produce of the dairy or to the breed, crosses of different races may be admitted, as long as the animals intended for propagation belong to the same class, and in the order of the milk-
mirrors do not deviate too much; that is, when their mirrors resemble each other.

It is a well known fact that the great majority of the Dutch cows, according to their milk-mirror, belong to the first class; the Swiss cows, and particularly those of the Simmenthal, to the second and third class; the cows of the south of Germany to the fourth, fifth, and sixth class; and those from the Eastern Alps, between Bavaria, Austria, and Upper Italy, to the seventh and eighth class.

We find, however, in all these breeds predominating classes, with all the inferior orders, from the first to the eighth, consequently with all the irregularities and varieties, which, in this case as in others, are the result of inattention to the mirror in the selection of the bulls. But in the same parts we also meet with the other classes, alongside of the predominating ones, with all their irregularities more or less, which is another proof of the necessity of coupling mirrors, resembling each other as nearly as possible. But even when the pairing has been effected with the utmost care and according to rule, there is another important circumstance, which, although it cannot affect the forming of the mirror, may yet produce a very injurious influence upon the yield of the milk, and which therefore ought not to be overlooked. This is the age of the cows. According to our experience, the first and
second calf of a young cow will rarely yield as much milk as the third, fourth, and fifth, to the eighth; whilst the ninth and tenth fall off again. Guenon does not mention this subject, although I do not doubt that in his observations, through so many years, his experience corresponds with mine. Nor can I omit the result of my own experience here, that through laziness or want of skill in the milker, and through untimely yielding to the tricks of the cows, the productiveness may be diminished or the quantity of milk be reduced for ever after. The person intrusted with the milking may, through want of diligence or skill, in a short time reduce the yield of a cow considerably, if he does not attend to his business daily, at regular times (not sometimes too early and sometimes too late), and does not empty the udder clean, I might say to the very last drop. If once he leaves but the hundredth part behind, he will the next time undoubtedly obtain the two-hundredth part less, and in this manner he may, notwithstanding the best feed and the most perfect health of the animal, gradually reduce the quantity of the milk, until it yields from two to three quarts less than before. The unskilfulness of the milker, however, may further injure the productiveness. By roughly drying the teats, and by hard pressure upon them in drawing, he torments the cow, she becomes irritable and retains her milk as much as possible, and when laziness is
added to this, the yield of the milk will diminish rapidly and strikingly. We should also exert ourselves to obviate the vices of those cows, which, when they are milked, are uneasy or kick, and try to milk them perfectly clean by some method or other. The simplest and most effective means, known all over Turkey and in Greece, is, to tie a thin hempen cord, just before beginning to milk, round one of the hind legs of the cow, and best, round that one with which she tries to prevent herself from being milked, close to the body, only once, to draw it as tight as possible and to knot it. This unwonted tension will soon make the animal very quiet and docile, and the business of milking can be proceeded with, without any further obstacle.

Sometimes it happens that cows, after they have had the first calf, learn to suck their own udders, and accustom themselves to do so when the milker neglects to milk them clean, at short and regular intervals. This produces a painful tension in the lacteals, which urges the tormented animal to aid itself by drawing the milk. When this has become a vice or a habit, the simplest method of preventing it, is, to put round the neck of the cow a light collar which closes and opens at the lower point, by which she will be prevented from bending the neck sufficiently to reach the teats with the mouth.

I should not have mentioned these irregularities and
defects, which often occur in the rearing of cattle, if they did not tend to create doubts as to the discovery of Guenon, or to injure the latter irreparably in the opinion of some cattle-breeders. But in spite of all these and other unfavourable circumstances, the theory of Guenon remains firm and unshaken: the natural yield of milk can be known from the form of the milk-mirror; but it is equally true, that the milk-mirror produces no milk, and that it can never supply what has been lost by want of diligence and of skill, by scantiness of food, or by ill-treatment and disease of the milk-cow.

To show, however, the full value of Guenon's discovery of the milk-mirror, we shall here give a short description of the signs by which heretofore the yield of the cow was estimated, and submit them to a brief scrutiny. These marks or "points" are still recognised in France, in Germany, in Belgium, in Switzerland, and in England, but only in part. Nowhere are all the points or milk-marks known or recognised.

The following are considered as favourable milk-marks:—

- **a**, a broad large mouth;
- **b**, yellow or short or thin horns;
- **c**, delicate, soft, short, and close hair;
- **d**, broad, well spread ribs;
- **e**, a broad chest;
f, a thin, long tail;
g, straight hind legs;
h, a regularly arched udder, covered with a short, close, silky down;
i, four teats of equal length and thickness;
k, thick projecting so called lacteal veins, which run along under the belly, from the udder, towards the fore-legs, forming a fork at the end, and finally losing themselves in a round cavity.
l, The milk-wart in the middle of the lower jaw, at the broadest part, nearer to the mouth than to the throat.

The more important of these points, are the five latter, from \( g \) to \( l \). The others are less decisive.

The following are considered unfavourable milk-marks:—

\( a \), long thick horns;
\( b \), a long, narrow, pointed head;
\( c \), a bull-like, puffy neck;
\( d \), indented, pointed spine;
\( e \), short, narrow ribs, not much bent;
\( f \), a short, thick tail;
\( g \), thin, long, bristly hair;
\( h \), unequally vaulted udder, with a few long hairs;
\( i \), teats of unequal length and thickness;
\( k \), hind legs, like those of a goat, bent in the form of a sickle;
PRODUCTIVENESS OF THE COW. 23

l, thin lacteal veins, almost imperceptible, without a fork, terminating in a point, and without any or with a very small and shallow indentation at the end (Milchschusselcher).

m, the milk-wart, when nearer the throat than the lower lip.

Among all these favourable and unfavourable signs, there is not one which by itself is decisive, but several of them must concur; besides this, they do not indicate the yield of milk, and still less the duration of this yield, from the time of calving to the period when the animal goes dry. Nor do we find in them any guide, not even a hint, what male animals are to be selected for the propagation, to sustain the productiveness of the breed, or to increase it by improvement. These defects are entirely removed by the milk-mirror discovered by Guenon, the truth and reliableness of which is most positively confirmed by the manner in which the milk-mirror of the first orders of each class agree with the heretofore known favourable marks of productiveness, and the less favourable and entirely unfavourable mirrors, with the known unfavourable marks or points. If therefore the marks, heretofore known, singly or several of them together, could be relied upon, which they can not, the milk-mirrors would still possess the great and important advantage over them, that they indicate not only the quantity of
the yield, but also its duration, while at the same time they point out the male animals, most suitable to sustain and to promote the productiveness in the afterbreed. But the most important advantage is undeniably, that they enable us to ascertain, in the male and female animals, at the age of three months, the future productiveness for the dairy, or the capacity of sustaining this productiveness, and that consequently we are not obliged to feed and foster for years an animal with the uncertain hope that it will be a good milker, merely because the mother belonged to a good milkingbreed. It can certainly not be denied, that the afterbreed sustains undiminished the productiveness for the dairy, less generally than that it degenerates or diminishes in this respect; the reason of this is, that hitherto the absolute condition of a correspondence between a male and a female animal, for the preservation of the productiveness in the progeny, has been entirely unknown, and generally is so now, and that consequently no attention could be paid to it.

Having thus given, with the utmost brevity, a sketch of the unsatisfactory and unreliable marks of the productiveness of the cattle for the dairy, I shall now with more confidence proceed to communicate the discoveries of Guenon, the application of his theory, and the advantages arising therefrom.
I. THE COW.

1. The Milk-Mirror.

Guenon, as we have mentioned before, bestowed upon the new marks of the productiveness of the cow, the appropriate name of "milk-mirror." From the time of his discovery, and during the twenty-five years of his observations and comparisons of these mirrors, and their secondary mark, he has collected so many varieties that their number amounts to from 200 to 300. This task no doubt was difficult and troublesome, but the second, to select from the large number of drawings the better qualities and their gradations down to the lowest, and to discover of each form the yield of milk and its duration, by an immense number of observations, was far more troublesome. An astonishing perseverance was requisite to fathom this secret and its varieties. To him belongs the merit of this very useful discovery. I, for my part, can only claim to have arranged the whole collection of Guenon's experiments into classes and orders, by which the general survey and the self-instruction is greatly facilitated, and the less instructed farmer, who, even when possessed of a clear understanding, has less leisure to travel into and through the large field of the discovery, is enabled to inform himself thoroughly, and to guard against errors and mistakes with but little trouble.
To attain this object, by which the discovery of Guenon will be most rapidly diffused, and thus become more generally useful, I have reduced the whole collection of Guenon’s illustrations, according to their principal features, into classes, and the varieties into orders or suborders, according to the degree of their unfavourable signs of productiveness, but have passed over and set aside a number of degenerate varieties, which indicate an inferior degree of productiveness, because I considered it, for the keeper of cattle, much more practical to become acquainted with the more favourable marks, and to direct his attention more to the manner of increasing his yield of milk, than to the manner by which he cannot increase it. For, whoever is desirous of increasing the produce of his dairy, will only look for such milk-mirrors as indicate a larger yield, and will set aside all others which will point to the contrary, both in purchasing or in selecting calves for breeding. I can assure the farmer, that in this description and in the illustration, no milk-mirror has been omitted which indicates a profitable yield of milk. When, therefore, an animal is not possessed of one of these favourable milk-mirrors, he will know at once, how to act; the classes and orders to which these bad qualities and their forms belong, will give him but little trouble. He will be satisfied to become acquainted with the many, here described, less good
and entirely bad mirrors, and with their signs and qualities, for their number suffices to instruct him how great the variety which can appear in the breeding of cattle.

As to the qualities and form of the milk-mirror, we are obliged to make the following introductory observations, to enable us to treat the separate classes and orders with greater simplicity. The position of the milk-mirror is bordered by a frame of hair which grows upwards, and of such as grows downwards; it begins in the middle between the four teats, ascending between the thighs towards the vulva and the anus, as indicated in the table by the white spots on the coloured animals.

In the mirror itself the hair grows upwards, and on the remaining part of the body downwards. When the direction of the hair is not evident, we have only to pass the fingers over these parts to feel it.

The secondary marks, as well in the milk-mirror as those out of it, can be known, by the former growing downwards, and the latter upwards.

These secondary marks, as well as their form and their position, do not reduce the mirror to another class, but merely to another order.

The secondary signs and the single spots of the mirror, are marked by the following letters;
a, The greatest breadth of the mirror in all the classes and orders.

bb, breadth of the upper end of the mirror in the first class;

c, spots of hair (0 0), only in the first class.

ff, incisions (0 0) always at the lower part of the mirror.

g, ovals (Ω) in the middle of the mirror or bastard signs of the first class (see Bastard, in the Table).

hh, breadth of the mirror in the middle.

ii, escutcheon or small escutcheon (Ω) alongside of the vulva.

kk, ovals (Ω) alongside of the vulva;

ll, whirls (quirls) (0 0) alongside of the vulva;

m, height of the mirror of the third class;

nn, height of the mirror of the fourth class;

o, incision of the mirror of the fourth class, downwards;

pp, height of the mirror of the fifth class;

q, r, s, angle of the sixth class upwards;

t, height of the mirror of the seventh class;

uu, second bastard-mark of the first class, second division.

kk, and ll, the bastard-marks of the second, third,
PRODUCTIVENESS OF THE COW.

fourth, fifth, sixth, and seventh class, first and second division.

The milk-mirrors I have divided into eight classes, according to their principal formations, and placed them in a line according to the productiveness which they indicate; so that the better stands under the first class, and the inferior under the eighth class.

The names of the classes indicate their form.

The first class is called "lyre-shaped,"
the second "selvage-shaped,"
the third "hill-shaped,"
the fourth "fork-shaped,"
the fifth "club-shaped,"
the sixth "square-shaped,"
the seventh "wedge-shaped,"
the eighth "shield-shaped."

Before entering upon the subject of the milk-mirrors and the qualities which they indicate, I shall give a general description of the good mirrors, which will at once convince every breeder of cattle, from the beginning of his self-instruction, and make him admit, notwithstanding all his knowledge of the breeding of cattle, he has never perceived or noticed these qualities.

We consider as good qualities in every breed and in every class;

1. A large mirror, having the same form on both sides;
2. Yellowish hair in the mirror, from which on rubbing with the finger, a yellowish branlike dust or dandruff appears;
3. Continuation of the mirror or of the same colour, and of the same hair under the tail, the further the better;
4. Close, fine, soft, silky hair in the mirror, on the udder, and in the secondary marks.

**Bad Signs.**

1. A small and irregular mirror;
2. Large secondary signs;
3. Coarse, bristly, thin hair in the mirror, on the udder, and in the secondary signs;
4. All the bastard-marks, as more particularly described below.

I shall now proceed to the description of the separate classes and orders.

**A. THE CLASSES.**

1st Class.

The form is lyre-shaped. The complete mirror commences in the middle of the four teats of the udder, which is covered with a short, fine down. It passes upwards over the whole back part of the udder, occupies the inner and outer surface of the thighs, and extends to a a (vide Tab. 1st Class 1st Order). Thence it curves
inward, rises to the anus 1½ to 2 inches wide on each side of the vulva at b b. Above the teats at c c we find two ovals, 2 inches in length by 1½ inch in breadth, with hair growing downwards. The inner part of the thigh upwards towards the vulva, is of a yellowish colour, with scattered black spots, where we find the bran or dandruff.

2d Class.

Selvage-shaped form. The mirror commences as in the first class, and ascends to the points a a (Tab. 2d Cl. 1st Ord.), thence the mirror descends somewhat on both sides and crosses inwardly to the points h h, which approach to the distance of 3 or 3½ inches. From the angles arises on each side a straight line, and continues upwards to the vulva, where they terminate, being from 1 to 1½ inch apart. The two ovals c c over the teats, are almost as large as those of the first class.

3d Class.

The mirror is hill-shaped; the beginning as in the first and second class (Tab. 3d Cl. 1st Ord.), but from the points a a it rises broader to m, to about 1 inch below the vulva. Ovals as in the 2d class.

4th Class.

The mirror is fork-shaped, and the beginning as in
the foregoing classes. From \(a a\) (Tab. 4th Cl. 1st Ord.)
it curves in on both sides to \(n n\), and terminates in two
points, about 3 inches below the vulva, turning in and
running down to \(o\) in the middle, where the two lines
meet again in a point, forming two horns or prongs.
On the right and on the left side, we find two small
escutcheons, \(i i\), about 1\(\frac{1}{2}\) inch long by \(\frac{1}{2}\) inch wide.
Ovals as in the foregoing classes.

5th Class.

The mirror is club-shaped, and the beginning as in
the foregoing classes. From the points \(a a\) (Tab. 5th
Cl. 1st Ord.), the mirror slopes across, rather down-
wards to \(h h\), which two points approach within about
4 inches, hence it rises to \(p\), 2\(\frac{1}{2}\) inches broad, where it
appears about 3 inches under the vulva, as if cut off.
The broader and the higher this stripe is, or the nearer
it approaches the vulva from \(h h\) to \(p\), the better is the
mark. On each side of the vulva there is an escut-
cheon \(i i\), 2 inches long and \(\frac{1}{2}\) inch wide. Above the
teats two ovals \(e e\), 3 inches long by 2 inches broad.

6th Class.

The mirror is of the form of a carpenter's square,
and begins as the foregoing classes. At \(a a\) (Tab. 6th
Cl. 1st Ord.), the lines on both sides run as in the 5th
class, only somewhat deeper towards \(h h\), and here ap-
proach each other within $3\frac{1}{2}$ to 4 inches; hence, the lines rise on both sides to $k$, 2 inches under the vulva, perpendicularly; here the mirror forms a right angle and then rises again, somewhat narrower on the left side of the vulva, to the anus to $s$. The more the angle approaches the vulva the better is the mark. Above the teats ovals $c\ c$, from 3 to 4 inches long and 2 inches broad.

7th Class.

The mirror is wedge-shaped, and its beginning as in the foregoing classes. From the point $a\ a$ (Tab. 7th Cl. 1st Ord.), the lines, as in the 5th and 6th classes, turn in, to $h\ h$, to about three inches. Thence they rise on both sides, in such a manner, that they form a point, 2 inches below the vulva at $t$. On both sides, escutcheons $i\ i$, 2 inches long and $\frac{1}{2}$ inch wide. The absence of these escutcheons indicates no smaller yield of milk. Above the teats two ovals, 3 inches long by two inches wide.

8th Class.

The milk-mirror is shield-shaped, and is remarkable for its shape, which looks as if cut off by the horizontal line $a\ a$, (Tab. 8th Cl. 1st Ord.). The secondary signs $i\ i$, alongside of the vulva, with the hair growing upwards, are about 3 inches long and scarcely $1\frac{1}{2}$ inch
broad. Above the teats ovals $cc$, as in the foregoing classes.

These are the eight principal forms, indicating the highest productiveness of the different classes or families, and, being perfect in their respective forms, belong to the first order of their classes.

The slightest deviation from these pattern mirrors and secondary marks places the milch-cows in the second order; and they descend into the third and fourth order, the more their form deviates from that of the first order of each class.

We now come to the orders, and shall only describe those particularly, the productiveness of which is sufficient to make the acquisition of the animals desirable, and with which an improvement in the breeding of cattle can be carried to the highest degree of perfection. For all other varieties we refer to the table, where the inferior qualities, which should be avoided or be removed from the breed, can be seen, together with the diminished quantity of the milk.

**B. THE ORDERS.**

**1st Order, 1st Class.**

This order has already been described in the first class; and we have only to add here, that the mirror indicates a daily yield of 20 quarts, and a duration of 9 months from the time of calving.
PRODUCTIVENESS OF THE COW.

It is however to be understood, that the proportion of the quantity and of the duration depends upon the suppositions that

a, the milch-cows are of the same age, calculating from the third calf to the eighth.
b, the feed is good and strong, without being exactly fattening.
c, the care is regular, and that the milking is performed by industrious individuals.
d, the cow is sound, and that her yield has not been weakened by any former sickness, and
e, that she is not used for draught.

2d Order, 1st Class.

The mirror is in form the same as that of the first order, only the extent is somewhat smaller in every direction. The ovals ee are narrower, and on the right side below the vulva is a stripe d (Tab. 1st Cl. 2d Order), about 2 inches in length and 1½ inch in breadth, with very short hair growing downwards.

Milk daily 19 quarts, duration 8 months from the time of calving.

3d Order, 1st Class.

The mirror is like that of the 2d order, only rather smaller. It becomes regularly smaller, the further the order is removed from the first, of which, to avoid repetition, the reader will take particular notice, as a
PRODUCTIVENESS OF THE COW.

general rule. Marks which distinguish this order from the first and second: a semicircular spot, the hair growing downwards e (Tab. 1st Cl. 3th Ord.), this spot joints the vulva in the form of a fork, and about $1\frac{1}{2}$ inch below it, is rounded off with a breadth of 2 inches. The hairs are shining and white. Above the teats there is but one oval on the left side c.

Quantity 17 quarts a day, duration 7 months.

4TH ORDER, 1ST CLASS.

The points a a retire more towards the inner part of the thighs, the points b b approach e on each side to within a small half inch of the vulva. The mirror does not reach as high as the anus, but descends from the upper points towards the middle of the vulva. From here an oblong spot with whitish hair, which grows downwards, descends, terminating in two acute angles.

Quantity 15 quarts a day, duration 6 months.

5TH ORDER, 1ST CLASS.

The spot under the vulva covered with whitish hair, which grows downwards (Tab. 1st Cl. 5th Order), is from 5 to 6 inches long and 1 inch wide; the lower part of the mirror forms a half oval incision on the right side, 5 inches high and 1 inch deep.

Quantity 13 quarts a day, duration 5 months.
6th Order, 1st Class.

This order, on account of the small yield of milk, can no longer be recommended. Hair-spots as in the fifth order. On the lower part of the mirror $ff$ (Tab. 1st Cl. 6th Ord.) we find on each side triangular incisions, 3 inches high and 1 1/2 inch deep.

Quantity 10 quarts a day, duration 4 months.

7th Order, 1st Class.

The mirror deviates considerably from that of the sixth class at $aa$ and $bb$ (Tab. 1st Cl. 7th Ord.). The left half, it is true, rises as far as the vulva, but the right half, covered with bristly hair, is only half as high. Below the point $a$ at $f$ the right side bends in a little, and forms an angle with the broader lower half. Coarse, thinly scattered hair cover the udder.

Quantity 7 quarts a day, duration 3 months.

8th Order, 1st Class.

The mirror is entirely confined to the interval between the thighs, is narrow and irregular, some bristling hair appears on the left and the right without any order.

The bastards of this class we shall describe hereafter with those of the other classes; and now follows

1st Order, 2d Class.

This has already been described under the 2d class.

Quantity 19 quarts a day, duration 8 months.
From \( a a \) (Tab. 2d Cl. 2d Ord.) the lines at \( hh \) incline more towards the middle, which renders the upper part of the mirror smaller than in the 1st order. On the left side of the vulva a small escutcheon 2 inches in length and \( \frac{1}{2} \) inch wide, with hair, growing upwards. The frame of the mirror is more glossy than the others. Over the teats only an oval \( e \) on the left side.

Quantity 17 quarts a day, duration 7 months.

3d Order, 2d Class.

From \( a a \), (Tab. 2d Cl. 3d Ord.), the lines of the mirror curve upwards, towards \( hh \), thence the latter ascends, as in the 2d order, but rather narrower to the vulva, on each side of which there is a small escutcheon \( ii \); that on the left side is as large as that in the 2d order, but the left rather shorter. The oval \( e \), smaller than in the second order, is also on the left side.

Quantity 15 quarts a day, duration 6 months.

4th Order, 2d Class.

Straight lines ascend from \( a a \) (Tab. 2d Cl. 4th Ord.) towards \( hh \), obliquely approaching each other towards the vulva. The two escutcheons \( ii \), near the vulva, are also of unequal size, but longer and broader than in the third order. Here the oval \( e \) of the second
and third order is missing, and does not reappear in the following orders of the second class.

Milk daily 13 quarts, duration 4½ months.

The remaining orders need not be described here. The reader will understand the illustrations from what has been said before.

1st Order, 3d Class.

Quantity 19 quarts a day, duration 8 months. The remaining particulars have been mentioned under the third class.

2d Order, 3d Class.

On the left side, near the vulva, an escutcheon i (Tab. 3d Cl. 2d Ord.), ½ inch in length and scarcely half an inch wide. An oval above the stripe c on the left side, somewhat smaller than in the first order.

Quantity 17 quarts a day, duration 7 months.

3d Order, 3d Class.

On each side of the vulva an escutcheon ii (Tab. 1st Cl. 3d Ord.) 3 inches long and ½ inch wide. Above the teats, to the left, a small oval c. The top m recedes further from the vulva in every new order.

Quantity 15 quarts a day, duration 6 months.

3d Order, 4th Class.

The mirror approaches nearer to the udder, and no longer ascends as high. Alongside of the vulva there
are two whirls \( i i \) (Tab. 3d Cl. 4th Ord.) longer and broader than the escutcheons of the preceding orders; the hairs bristle towards every side. At \( a \), on the right side, an incision begins and continues to \( f \).

Quantity 13 quarts a day, duration 4½ months. For the reasons given before, the remaining orders of this class will not be further described.

**1st Order, 4th Class.**

Quantity 17 quarts a day, duration 8 months.

**2d Order, 4th Class.**

The mirror is lower and narrower and the right prong, 1 inch shorter than the left \( u u \) (Tab. 4th Cl. 2d Ord.). The escutcheon on the left is as large as in the 1st order, but that on the right is only half as large. Above the teats an oval to the left. Quantity 15 quarts a day, duration 7 months.

**3d Order, 4th Class.**

On the left side of the vulva an escutcheon \( i \) (Tab. 4th Cl. 3d Ord.) and the right prong or horn of the mirror 1½ inch shorter than the left.

Quantity 13 quarts a day, duration 6 months.

**4th Order, 4th Class.**

Under the vulva a stripe \( d \), (Tab. 4th Cl. 4th Ord.) the hair ascending, good 2 inches long, scarcely ½ inch wide; the right prong also 1½ inch shorter.
than the left, and below a towards f an incision, 3 inches wide by 5 inches long.

Quantity 10 quarts a day, duration 5 months.

5th Order, 4th Class.

On the left side of the vulva a whirl i (Tab. 4th Cl. 5th Ord.) of ascending bristly hair, 5 inches long and 1½ inch broad. Under a a angular incisions ff. In all the remaining orders of this class the right prong appears shorter than the left.

Quantity 8 quarts a day, duration 4 months. For the further orders of this class, see the Table.

1st Order, 5th Class.

Quantity 17 quarts a day, duration 8 months.

2d Order, 5th Class.

The lines from a a towards h h (Tab. 5th Cl. 2d Ord.) ascend a little. The two little escutcheons alongside of the vulva i i are unequal in size; the left resembles that of the first order, the right is as wide but only half as long. Above the teats an oval c on the left.

Quantity 15 quarts a day, duration 7 months.

3d Order, 5th Class.

The corners a a (Tab. 5th Cl. 3d. Ord.) are more rounded, and recede from the thighs. On the left of the vulva, only one escutcheon i, a full inch long and
PRODUCTIVENESS OF THE COW.

scarcely ½ inch wide. In this and in the following orders the oval above the teats is missing.

Quantity 13 quarts a day, duration 6 months.

4th Order, 5th Class.

From a a to p (Tab. 5th Cl. 4th Ord.) the mirror ascends, curving and growing narrower. Below a an incision as far as f, semicircular.

Quantity 10 quarts a day, duration 5 months. The remaining orders are illustrated in the Table.

1st Order, 6th Class.

Quantity 17 quarts a day, duration 8 months.

2d Order.

The square q r (Tab. 6th Cl. 2d Ord.) is at a distance of 3 inches from the vulva, and as this distance increases in the following orders, the more the stripe r s, on the left side, becomes elongated. Above the teats also an oval c.

Quantity 15 quarts a day, duration 7 months.

3d Order, 6th Class.

The lines from a a to h h (Tab. 6th Cl. 3d Ord.) ascend rather obliquely, the square is 4 inches below the vulva, and gradually shortens in each following order.

Quantity 13 quarts a day, duration 6 months.
4TH ORDER, 6TH CLASS.

On the right side of the vulva a whirl \(i\) (Tab. 6th Cl. 4th Ord.), with ascending bristly hair, 3 inches long, and rather more than \(\frac{1}{2}\) inch wide. The stripe \(r\) with spreading hair is broader than in the third order. Below \(a\), on the right side, extending to \(f\), we find an oblique angular incision.

Quantity 10 quarts a day, duration 5 months.

5TH ORDER, 6TH CLASS.

The stripe \(r\) of the square \(k\), and the whirl on the right side of the vulva, have bristling hair spreading rather upwards. Incision as in the fourth order.

Quantity 8 quarts a day, duration 4 months.

For the remaining orders, see the Table.

1ST ORDER, 7TH CLASS.

Quantity 15 quarts a day, duration 8 months.

2D ORDER, 7TH CLASS.

The mirror rather shorter and smaller, and the two escutcheons \(i\) (Tab. 7th Cl. 2d Ord.), on the sides of the vulva, shorter, but broader than in the first order. Above the teats an oval \(e\) to the left.

Milk daily 13 quarts, duration 7 months.

3D ORDER, 7TH CLASS.

The mirror smaller than in the 2d order, and the
escutcheon $i$ (Tab. 7th Cl. 3d Ord.) to the left of the vulva 4 inches long and 1 inch wide. The point of the mirror is 5 inches from the vulva. No farther oval.

Quantity 10 quarts a day, duration 6 months.

4th Order, 7th Class.

Here we have only one escutcheon $i$ (Tab. 7th Cl. 4th Ord.) to the left of the vulva, 7 inches long and 1 inch wide.

Quantity 8 quarts a day, duration 5 months.

When in the remaining orders, there are whirls with bristling hair; they are longer and wider than the escutcheons in the preceding orders.

For the remaining orders, see the Table.

1st Order, 8th Class.

Quantity 13 quarts a day, duration 8 months.

2d Order, 8th Class.

The escutcheons $i$ $i$ (Tab. 8th Cl. 2d Ord.) to the right and to the left of the vulva, are dissimilar. The one on the left as large as in the first order, that on the right one inch shorter. Several, though not all the cows of this order, have below the vulva a stripe of ascending hair, which nearly reaches the vulva; it is $1\frac{1}{8}$ inch long, and $\frac{3}{4}$ inch wide. An oval $e$ is above the teats on the left side.
PRODUCTIVENESS OF THE COW.

Quantity 10 quarts a day, duration 7 months.

3d Order, 8th Class.

On the left side of the vulva an escutcheon \( i \) (Tab. 8th Cl. 3d Ord.) the hair of which rises as in a vortex, and is somewhat bristling; it measures from 4 to 5 inches in length, and 1 inch in breadth. Under \( a \) on the right side, there is towards \( f \), an acute-angled incision, 6 inches broad and 7 inches deep.

Quantity 8 quarts a day, duration 6 months.

For the remaining orders see the Table.

THE BASTARD COWS

Of the 1st Class.

The cows of this class consist of two kinds. Those of the first kind have in the ascending hair of the mirror, between the thighs and between the vulva and the udder, an oval, formed of descending hair, \( g \) (Bastard Tab. 1st Cl. 1st Divis.), 3 inches long and 2 inches wide, of a whitish colour. The larger the oval, the sooner the milk will fail, and vice versa, the smaller the oval the longer the cow will give milk. But the early failing of the milk is a general rule. In every other respect the mirror is entirely like that of the first order of the first class.
The second kind of the bastards is distinguished by the hair of the mirror not ascending towards the vulva, but bristling like the beard of an ear of wheat, \( w w \) (Bastard Tab. 1st Cl. 2d Div.) and spread over the thighs from \( a a \) to \( b b \). The broader the mirror and the finer the hair, the greater is the yield of milk, until the cow is again in calf; but when the hair is coarse, long, and thin, the yield is very small. The interior of the thighs to the vulva is somewhat reddish, the skin fine and soft, but there is no dandruff. All bastard cows of the first seven classes, of the first and second division, have above the teats two ovals \( c c \).

2d Class.

These bastards are distinguished in every order by two ovals \( k k \) (Bastard Tab. 2d Cl. 1st Div.) as by two whirls \( ii \) (2d Div.) to the right and left side of the vulva; these marks are separate, an inch from the vulva; their length is 4 inches and their breadth 1\( \frac{1}{2} \) inch. When the marks are small and fine-haired, the milk fails more slowly; but when they terminate in two points and the hair is coarse, it turns watery.

3d Class.

These have escutcheons and whirls \( k k \) and \( ii \) (Bastard Tab.) as the 2d Class. The ovals are marks more favourable than the whirls; the larger both these
marks are, the smaller is the yield of milk; and the smaller they are, the more abundant the yield.

4th Class.
Similar to the 3d class, pointing to the same qualities.

5th Class.
The same as the 3d class.

6th Class.
The broader and longer the oval k (Bastard Tab. 6th Cl. 2d Div.) or the whirl with spreading hair on the right side of the vulva, and the broader and longer the line r s on the left side, the greater is the degeneracy of the animals of this class in all its orders, and the smaller the quantity, goodness, and duration of the yield.

7th Class.
The same as the 3d and 4th classes.

8th Class.
These bastards have no mirror at all, and no hair growing upwards.

A few hints more for the breeder of cattle may not be superfluous.
Cows of extraordinary productiveness, of the first and second order, should be fed more carefully before and after calving. During this time rather the quality
than the quantity of the feed should be diminished, to avoid too great a flow of milk, or stagnation and consequent inflammation. It is therefore advisable to milk the cows, for some time, three times a day, every eight hours; after the first and second calving it may even be done four times, namely every six hours.

That no milk whatever may remain behind, it is necessary that a person, able and willing, should milk the cow quite clean, immediately after dropping the calf; that the calf should not be allowed to suck the cow, but that the milk from the cow should be put into a vessel, from which the calf will suck by means of a mouth-piece, until it gets accustomed to drink out of the vessel. The sucking of the cow by the calf has many disadvantages. When the cow has a sore udder, it will hurt her; when she gives a great quantity of milk, the calf will either take too much and fall sick, or it will not suck her clean, and the yield will diminish before you begin to milk her. Besides, the cattle-breeder cannot know how much the calf consumes as long as he is unacquainted with the yield of his cow; he cannot judge whether the calf receives too much or too little food.

In a large dairy, it is very advantageous to separate at once, the first half of the milk obtained from the second half, and to put it into separate vessels. The last half contains from 30 to 40 per cent. more butter.
The first milk will be used for common purposes, and the second for making butter.

II. BULLS.

The second, and not less important discovery of Guenon, is that the bull has the same marks as the milch-cow, only somewhat shorter and narrower. They differ, however, from those of the cow, by beginning behind the testicles, and terminating on the side of, or under, the anus. Guenon bestows upon these marks the same name "milk-mirror," which may be justified in as far as the bull has greater influence upon the sustaining or obtaining of an abundant yield of milk, as well as upon the improvement of the breed. For a good cow drops ordinarily one calf a year, whilst the bull can impregnate from sixty to a hundred cows annually. We shall therefore retain also for him the name of "milk-mirror." A number of experiments and trials have confirmed the statement of Guenon, that the yield of milk can only be sustained or improved by coupling the cow with a bull of the same class, bearing the same or better marks. It therefore becomes the duty of every cattle-breeder, to exercise the utmost caution in the selection of the bull-calves for the breed. It cannot be denied, that the cows which yield a great
deal of milk, and yield it long, are rarer than those which yield but little, and only for a short time. This disproportion is owing entirely to the mistakes in selecting bulls, for want of knowing the male marks or points.

Every cattle-breeder will rear the female calves of a very good milch-cow, as well for the dairy as for stock, and consequently, we frequently find from four to six descendants from a good milker in the same stall, but on asking whether these descendants, which externally resemble their mother, yield as much milk, we unfortunately hear the contrary, and are told that they degenerate more and more. This proves evidently that the bulls, with which the cows have been coupled, have belonged to another race (class and order), less productive for the dairy. But even when bulls and cows bear the same marks, it may sometimes happen that the bull and cow-calves are provided with inferior milk-mirrors. But such occurrences must not deter the cattle-breeder; he need not regret his selection, but continue assiduously both with old and young animals; for the good and bad qualities of the old ones frequently do not reappear until the second and third generation.

If the cattle-breeder will keep a genealogical register of his stock, such as sensible breeders of horses keep,
he will soon convince himself that in this case as in all others, perseverance alone will insure success.

*Experience has confirmed the fact,* that the more docile, the milder the appearance of the cow, the greater her usefulness; and it cannot be doubted that such a cow has descended, both on the male and female side, from a productive race. But if this is true, why should we not prefer the same mild, pleasing form, to a rough and wild appearance, in the bull? These qualities, however, have not been attended to heretofore, have not been preferred. Rather the contrary has been the practice, and we must not be astonished at the degeneration of the progeny of excellent races. It is nothing but a natural consequence: the good qualities of the mother were counteracted by the defects of the father.

The productiveness of the cattle for the dairy in a higher degree, is a quality which has been cultivated and improved. In the natural state, the demand for milk was limited to the wants of the young, and the yield of a cow, which we now call trifling, may at that time have sufficed, both in quantity and duration. According to the wise provisions of nature which we find everywhere, we must suppose that in a wild state no more milk was produced than was necessary for the health of the cow and of the calf, the same as it is with other animals. Gradually, as the horned cattle became domesticated, and as man undertook to provide
for their support, the yield of the milk increased; for we find to this day, that the greater the care which we bestow upon them, the more their productiveness will appear. The difference between stall-fed cattle, and cattle allowed to feed in the meadows, may be observed every day.

We may assert, without fear of being contradicted, that horned cattle, in their natural state, appeared wilder, than they do in their domesticated condition, and that consequently, care bestowed upon the selection of the bull will not only prevent degeneration, but contribute to the improvement of the stock. This observation is founded upon the milder and more docile appearance of bulls which are provided with good milk-marks, and which are not disfigured by a thick, puffy, lion neck.

An abundant yield of milk can therefore be already secured, by a careful selection, as soon as the bull-calves are three months old, or it may be obtained by the purchasing of bulls with good milk-marks. The improvement will be observable in the next generation, but will become more striking in the second. We find sometimes, though not often, and only by chance, bulls, with the best milk-marks, being at the same time perfect in body, having broad lines, a straight chine, straight legs, round thighs, vaulted ribs, a strong neck, a short square head, large eyes, and middling-sized well-formed horns. Another proof that the bull
has to contribute to the improvement of the breed of cattle or to the increase in the productiveness for the dairy, and that this, his avocation, is founded upon numerous experiments.

After thus having fully explained the good and bad qualities of the cow and of the bull, and having proved the necessity of their having corresponding milk-marks, we come to the last chapter.

THE CROSSING OF BREEDS.

Crossing is the coupling of male and female animals, provided with milk-marks from different classes or orders, as also of different races.

This crossing produces two kinds of results. Animals, having similar milk-marks, but from different races, particularly when the male belongs to a better race, may be coupled without injury to the yield of the milk. But crosses between different classes always produce unfavourable results, and more so when the bull belongs to an inferior order, or even to an inferior class.

Such pairing of the sexes will reduce the breed to a lower class or order; it may even cause a great disfigurement in the milk-mirror, and make a classification impossible, when, as a matter of course, it becomes impracticable to ascertain the order to which the animal belongs.
Advantages can only be obtained by the crossing of different breeds or races, when the mirrors of both animals correspond, or still better, when the mirror of the male belongs to a higher order.

If however the object of the crossing is to obtain a heavier stock of cattle, it is advisable rather to procure a male animal, which of course must be provided with the corresponding milk-marks. By this means the object of the crossing will be obtained sooner than by the purchase of a cow.

THE PERFECT BREED.

If the breeder of cattle, through a careful application of the above explained theory and rules, succeeds in uniting in one breed all the qualities we look for in cattle, in the highest state of perfectibility, his task is accomplished. With such a breed he will never part; it will be to him an inexhaustible mine, an everlasting treasure.

THE END.

THE BEST & MOST COMPLETE FAMILY COMMENTARY.
The Comprehensive Commentary on the Holy Bible;
CONTAINING
THE TEXT ACCORDING TO THE AUTHORIZED VERSION,
SCOTT'S MARGINAL REFERENCES; MATTHEW HENRY'S COMMENTARY,
CONDENSED, BUT RETAINING EVERY USEFUL THOUGHT; THE
PRACTICAL OBSERVATIONS OF REV. THOMAS SCOTT, D.D.;
WITH EXTENSIVE
EXPLANATORY, CRITICAL AND PHILOLOGICAL NOTES,
Selected from Scott, Doddridge, Gill, Adam Clarke, Patrick, Poole, Lowth, Burder, Harmer, Calmet, Rosenmueller, Bloomfield, Stuart, Bush, Dwight, and many other writers on the Scriptures.
The whole designed to be a digest and combination of the advantages of the best Bible Commentaries, and embracing nearly all that is valuable in
HENRY, SCOTT, AND DODDRIDGE.
Conveniently arranged for family and private reading, and, at the same time, particularly adapted to the wants of Sabbath-School Teachers and Bible Classes; with numerous useful tables, and a neatly engraved Family Record.
Edited by REV. WILLIAM JENKS, D. D.,
PASTOR OF GREEN STREET CHURCH, BOSTON.
Embellished with five portraits, and other elegant engravings, from steel plates; with several maps and many wood-cuts, illustrative of Scripture Manners, Customs, Antiquities, &c. In 6 vols. super-royal 8vo.
Including Supplement, bound in cloth, sheep, calf, &c., varying in
Price from $10 to $15.
The whole forming the most valuable as well as the cheapest Commentary published in the world.
NOTICES AND RECOMMENDATIONS  
OF THE  
COMPREHENSIVE COMMENTARY.  

The Publishers select the following from the testimonials they have received as to the value of the work:  

We, the subscribers, having examined the Comprehensive Commentary, issued from the press of Messrs. L. G. & Co., and highly approving its character, would cheerfully and confidently recommend it as containing more matter and more advantages than any other with which we are acquainted; and considering the expense incurred, and the excellent manner of its mechanical execution, we believe it to be one of the cheapest works ever issued from the press. We hope the publishers will be sustained by a liberal patronage, in their expensive and useful undertaking. We should be pleased to learn that every family in the United States had procured a copy.

From the Professors at Princeton Theological Seminary.  

The Comprehensive Commentary contains the whole of Henry's Exposition in a condensed form, Scott's Practical Observations and Marginal References, and a large number of very valuable philosophical and critical notes, selected from various authors. The work appears to be executed with judgment, fidelity, and care; and will furnish a rich treasure of scriptural knowledge to the Biblical student, and to the teachers of Sabbath-Schools and Bible Classes.  

A. ALEXANDER, D. D.  

SAMUEL MILLER, D. D.  

CHARLES HODGE, D. D.
The Companion to the Bible.
In one super-royal volume.

DESIGNED TO ACCOMPANY
THE FAMILY BIBLE,
OR HENRY'S, SCOTTS', CLARKE'S, GILL'S, OR OTHER COMMENTARIES:
CONTAINING
1. A new, full, and complete Concordance;
Illustrated with monumental, traditional, and oriental engravings, founded on Butterworth's, with Cruden's definitions; forming, it is believed, on many accounts, a more valuable work than either Butterworth, Cruden, or any other similar book in the language.

2. A Guide to the Reading and Study of the Bible;
being Carpenter's valuable Biblical Companion, lately published in London, containing a complete history of the Bible, and forming a most excellent introduction to its study. It embraces the evidences of Christianity, Jewish antiquities, manners, customs, arts, natural history, &c., of the Bible, with notes and engravings added.

3. Complete Biographies of Henry, by Williams; Scott, by his son; Doddridge, by Orton;
with sketches of the lives and characters, and notices of the works, of the writers on the Scriptures who are quoted in the Commentary, living and dead, American and foreign.

This part of the volume not only affords a large quantity of interesting and useful reading for pious families, but will also be a source of gratification to all those who are in the habit of consulting the Commentary; every one naturally feeling a desire to know some particulars of the lives and characters of those whose opinions he seeks. Appended to this part, will be a

BIBLIOTHECA BIBLICA,
or list of the best works on the Bible, of all kinds, arranged under their appropriate heads.

4. A complete Index of the Matter contained in the Bible Text.

5. A Symbolical Dictionary.

6. The Work contains several other Articles,
Indexes, Tables, &c. &c., and is,

7. Illustrated by a large Plan of Jerusalem,
identifying, as far as tradition, &c., go, the original sites, drawn on the spot by F. Catherwood, of London, architect. Also, two steel engravings of portraits of seven foreign and eight American theological writers, and numerous wood engravings.
The whole forms a desirable and necessary fund of instruction for the use not only of clergymen and Sabbath-school teachers, but also for families. When the great amount of matter it must contain is considered, it will be deemed exceedingly cheap.

"I have examined "The Companion to the Bible," and have been surprised to find so much information introduced into a volume of so moderate a size. It contains a library of sacred knowledge and criticism. It will be useful to ministers who own large libraries, and cannot fail to be an invaluable help to every reader of the Bible."
HENRY MORRIS
Pastor of Congregational Church, Vermont.
The above work can be had in several styles of binding. Price varying from $1.75 to $5.00.
ILLUSTRATIONS OF THE HOLY SCRIPTURES,
In one super-royal volume.
DERIVED PRINCIPALLY FROM THE MANNERS, CUSTOMS, ANTIQUITIES, TRADITIONS,
AND FORMS OF SPEECH, RITES, CLIMATE, WORKS OF ART, AND
LITERATURE OF THE EASTERN NATIONS:
EMBODying ALL THAT IS VALUABLE IN THE WORKS OF
ROBERTS, HARMER, BURDER, FAXTON, CHANDLER,
And the most celebrated oriental travellers. Embracing also the subject of the Fulfilment of
Prophecy, as exhibited by Keath and others; with descriptions of the present state
of countries and places mentioned in the Sacred Writings.
ILLUSTRATED BY NUMEROUS LANDSCAPE ENGRAVINGS,
FROM SKETCHES TAKEN ON THE SPOT.
Edited by Rev. George Bush,
Professor of Hebrew and Oriental Literature in the New York City University.
The importance of this work must be obvious, and, being altogether illustrative, without reference
to doctrines, or other points in which Christians differ, it is hoped it will meet with favour from all
who love the sacred volume, and that it will be sufficiently interesting and attractive to recommend
itself, not only to professed Christians of all denominations, but also to the general reader. The
arrangement of the texts illustrated with the notes, in the order of the chapters and verses of the
authorized version of the Bible, will render it convenient for reference to particular passages:
while the copious Index at the end will at once enable the reader to turn to every subject discussed
in the volume.
This volume is not designed to take the place of Commentaries, but is a distinct department of biblical
instruction, and may be used as a companion to the Comprehensive or any other Commentary, or the
Holy Bible.
THE ENGRAVINGS
in this volume, it is believed, will form no small part of its attractions. No pains have been spared
to procure such as should embellish the work, and, at the same time, illustrate the text. Objections
that have been made to the pictures commonly introduced into the Bible, as being mere creations
of fancy and the imagination, often unlike nature, and frequently conveying false impressions,
cannot be urged against the pictorial illustrations of this work. Here the fine arts are made
subservient to utility, the landscape views being, without an exception, matter-of-fact views of places
mentioned in Scripture, as they appear at the present day; thus in many instances exhibiting, in the
most forcible manner, to the eye, the strict and literal fulfilment of the remarkable prophecies; “the
present ruined and desolate condition of the cities of Babylon, Nineveh, Scith, &c., and the coun-
tries of Edom and Egypt, are astonishing examples, and so completely exemplify, in the most
minute particulars, every thing which was foretold of them in the height of their prosperity, that
no better description can now be given of them than a simple quotation from a chapter and verse
of the Bible written nearly two or three thousand years ago.” The publishers are enabled to select
from several collections lately published in London, the proprietor of one of which says that “seve-
ral distinguished travellers have afforded him the use of nearly Three Hundred Original Sketchers”
of Scripture places, made upon the spot. “The land of Palestine, it is well known, abounds in
scenes of the most picturesque beauty. Syria comprehends the snowy heights of Lebanon, and the
majestic ruins of Tadmor and Jerash.”
The above work can be had in various styles of binding.
Price from $1 50 to $5 00.

THE ILLUSTRATED CONCORDANCE,
In one volume, royal 8vo.
A new, full, and complete Concordance; illustrated with monumental, traditional, and oriental
engravings, founded on Butterworth’s, with Cruden’s definitions; forming, it is believed, on many
accounts, a more valuable work than either Butterworth, Cruden, or any other similar book in the
language.
The value of a Concordance is now generally understood; and those who have used one, con-
sider it indispensable in connection with the Bible. Some of the many advantages the Illustrated
Concordance has over all the others, are, that it contains near two hundred appropriate engraving:
it is printed on fine white paper, with beautiful large type.
Price One Dollar.
LIPPINCOTT'S EDITION OF
BAGSTER'S COMPREHENSIVE BIBLE.

In order to develop the peculiar nature of the Comprehensive Bible, it will only be necessary to embrace its more prominent features.

1st. The SACRED TEXT is that of the Authorized Version, and is printed from the edition corrected and improved by Dr. Blaney, which, from its accuracy, is considered the standard edition.

2d. The VARIOUS READINGS are faithfully printed from the edition of Dr. Blaney, inclusive of the translation of the proper names, without the addition or diminution of one.

3d. In the CHRONOLOGY, great care has been taken to fix the date of the particular transactions, which has seldom been done with any degree of exactness in any former edition of the Bible.

4th. The NOTES are exclusively philological and explanatory, and are not tinted with sentiments of any sect or party. They are selected from the most eminent Biblical critics and commentators.

It is hoped that this edition of the Holy Bible will be found to contain the essence of Biblical research and criticism, that lies dispersed through an immense number of volumes.

Such is the nature and design of this edition of the Sacred Volume, which, from the various objects it embraces, the freedom of its pages from all sectarian peculiarities, and the beauty, plainness, and correctness of the typography, that it cannot fail of proving acceptable and useful to Christians of every denomination.

In addition to the usual references to parallel passages, which are quite full and numerous, the student has all the marginal readings, together with a rich selection of Philological, Critical, Historical, Geographical, and other valuable notes and remarks, which explain and illustrate the sacred text. Besides the general introduction, containing valuable essays on the genuineness, authenticity, and inspiration of the Holy Scriptures, and other topics of interest, there are introductory and concluding remarks to each book—a table of the contents of the Bible, by which the different portions are so arranged as to read in an historical order.

Arranged at the top of each page is the period in which the prominent events of sacred history took place. The calculations are made for the year of the world before and after Christ, Julian Period, the year of the Olympiad, the year of the building of Rome, and other notations of time. At the close is inserted a Chronological Index of the Bible, according to the computation of Archbishop Ussher. Also, a full and valuable index of the subjects contained in the Old and New Testaments, with a careful analysis and arrangement of texts under their appropriate subjects.

Mr. Greenfield, the editor of this work, and for some time previous to his death the superintendent of the editorial department of the British and Foreign Bible Society, was a most extraordinary man. In editing the Comprehensive Bible, his varied and extensive learning was called into successful exercise, and appears in happy combination with sincere piety and a sound judgment. The Editor of the Christian Observer, alluding to this work, in an obituary notice of its author, speaks of it as a work of "prodigious labour and research, at once exhibiting his varied talents and profound erudition."

LIPPINCOTT'S EDITION
OF
THE OXFORD QUARTO BIBLE.

The Publishers have spared neither care nor expense in their edition of the Bible; it is printed on the finest white vellum paper, with large and beautiful type, and bound in the most substantial and splendid manner, in the following styles: Velvet, with richly gilt ornaments; Turkey super extra, with gilt clasps; and in numerous others, to suit the taste of the most fastidious.

OPINIONS OF THE PRESS.

"In our opinion, the Christian public generally will feel under great obligations to the publishers of this work for the beautiful taste, arrangement, and delicate features with which they have got it out. The intrinsic merit of the Bible recommends itself; it needs no tinsel ornament to adorn its sacred pages. In this edition every superfluous ornament has been avoided, and we have presented a perfectly chaste specimen of the Bible, without note or commentary. It appears to be just what is needed in every family—the unadorned word of God."

"The size is quarto, printed with beautiful type, on white, aged vellum paper, of the finest texture and most beautiful surface. The publishers seem to have been solicitous to make a perfectly unique book, and they have accomplished the object very successfully. We trust that a liberal community will afford them ample remuneration for all the expense and outlay they have necessarily incurred in its publication. It is a superb Bible."

"The publishers are Messrs. Lippincott, Grambo & Co., No. 14 North Fourth street, Philadelphia."

— Baptist Record.

"A beautiful quarto edition of the Bible, by L. G. & Co. Nothing can exceed the type in clearness and beauty; the paper is of the finest texture, and the whole execution is exceedingly neat. No illustrations or ornamental type are used. Those who prefer a Bible executed in perfect simplicity, yet elegance of style, without adornment, will probably never find one more to their taste."

— Monthly Review.
LIPPINCOTT, GRAMBO & CO.'S PUBLICATIONS.

LIPPINCOTT'S EDITIONS OF THE HOLY BIBLE.
SIX DIFFERENT SIZES.

Printed in the best manner, with beautiful type, on the finest sized paper, and bound in the most splendid and substantial styles. Warranted to be correct, and equal to the best English editions, at much less price. To be had with or without plates; the publishers having supplied themselves with over fifty steel engravings, by the first artists.

Baxter's Comprehensive Bible,

Royal quarto, containing the various readings and marginal notes; disquisitions on the genuineness, authenticity, and inspiration of the Holy Scriptures; introductory and concluding remarks to each book; philological and explanatory notes; table of contents, arranged in historical order; a chronological index, and various other matter; forming a suitable book for the study of clergymen, Sabbath-school teachers, and students.

The Errors of Modern Infidelity Illustrated and Refuted.
BY S. M. SCHMUCKER, A.M.
In one volume, 12mo.; cloth. Just published.

We cannot but regard this work, in whatever light we view it in reference to its design, as one of the most masterly productions of the age, and fitted to uproot one of the most fondly cherished and dangerous of all ancient or modern errors. God must bless such a work, armed with his own truth, and doing fierce and successful battle against black infidelity, which would uproot His Majesty and Word down to the tribunal of human reason, for condemnation and annihilation.—Alb. Spectator.
The Clergy of America:
CONSISTING OF
ANECDOTES ILLUSTRATIVE OF THE CHARACTER OF MINISTERS OF RELIGION IN THE UNITED STATES,
BY JOSEPH BELCHER, D. D.,

"This very interesting and instructive collection of pleasing and solemn remembrances of many pious men, illustrates the character of the day in which they lived, and defines the men more clearly than very elaborate essays." — Baltimore American.

JOSEPHUS'S (FLAVIUS) WORKS,
FAMILY EDITION.
BY THE LATE WILLIAM WHISTON, A. M.
FROM THE LAST LONDON EDITION, COMPLETE.
One volume, beautifully illustrated with Steel Plates, and the only readable edition published in this country.

As a matter of course, every family in our country has a copy of the Holy Bible; and as the presumption is that the greater portion often consult its pages, we take the liberty of saying to all those that do, that the perusal of the writings of Josephus will be found very interesting and instructive. All those who wish to possess a beautiful and correct copy of this valuable work, would do well to purchase this edition. It is for sale at all the principal bookstores in the United States, and by country merchants generally in the Southern and Western States.

Also, the above work in two volumes.

BURDER'S VILLAGE SERMONS;
Or, 101 Plain and Short Discourses on the Principal Doctrines of the Gospel.
INTENDED FOR THE USE OF FAMILIES, SUNDAY-SCHOOLS, OR COMPANIES ASSEMBLED FOR RELIGIOUS INSTRUCTION IN COUNTRY VILLAGES.
BY GEORGE BURDER.
To which is added to each Sermon, a Short Prayer, with some General Prayers for Families, Schools, &c., at the end of the work.
COMPLETE IN ONE VOLUME, OCTAVO.

These sermons, which are characterized by a beautiful simplicity, the entire absence of controversy, and a true evangelical spirit, have gone through many and large editions, and been translated into several of the continental languages. "They have also been the honoured means not only of converting many individuals, but also of introducing the Gospel into districts, and even into parish churches, where before it was comparatively unknown."

"This work fully deserves the immortality it has attained."

This is a fine library edition of this invaluable work; and when we say that it should be found in the possession of every family, we only reiterate the sentiments and sincere wishes of all who take a deep interest in the eternal welfare of mankind.

FAMILY PRAYERS AND HYMNS,
ADAPTED TO FAMILY WORSHIP,
AND
TABLES FOR THE REGULAR READING OF THE SCRIPTURES.
By Rev. S. C. WINCHESTER, A. M.,
Late Pastor of the Sixth Presbyterian Church, Philadelphia; and the Presbyterian Church at Natchez, Miss.
One volume, 12mo.
The following Editions of Standard British Poets are illustrated with numerous Steel Engravings, and may be had in all varieties of binding.

**BYRON'S WORKS.**

**COMPLETE IN ONE VOLUME, OCTAVO.**

INCLUDING ALL HIS SUPPRESSED AND ATTRIBUTED POEMS; WITH SIX BEAUTIFUL ENGRAVINGS.

This edition has been carefully compared with the recent London edition of Mr. Murray, and made complete by the addition of more than fifty pages of poems heretofore unpublished in England. Among these there are a number that have never appeared in any American edition; and the publishers believe they are warranted in saying that this is the most complete edition of Lord Byron's Poetical Works ever published in the United States.

**The Poetical Works of Mrs. Hemans.**

Complete in one volume, octavo; with seven beautiful Engravings.

This is a new and complete edition, with a splendid engraved likeness of Mrs. Hemans, on steel, and contains all the Poems in the last London and American editions. With a Critical Preface by Mr. Thatcher, of Boston.

As no work in the English language can be commended with more confidence, it will argue bad taste in a female in this country to be without a complete edition of the writings of one who was an honor to her sex and to humanity, and whose productions, from first to last, contain no syllable calculated to call a blush to the cheek of modesty and virtue. There is, moreover, in Mrs. Hemans's poetry, a moral purity and a religious feeling which commend it, in an especial manner, to the discriminating reader. No parent or guardian will be under the necessity of imposing restrictions with regard to the free perusal of every production emanating from this gifted woman. There breathes throughout the whole a most eminent exemption from impropriety of thought or diction; and there is at times a pensiveness of tone, a winning sadness in her more serious compositions, which tells of a soul which has been lifted from the contemplation of terrestrial things, to divine communings with beings of a purer world.

**MILTON, YOUNG, GRAY, BEATTIE, AND COLLINS'S POETICAL WORKS.**

**COMPLETE IN ONE VOLUME, OCTAVO.**

**WITH SIX BEAUTIFUL ENGRAVINGS.**

Cowper and Thomson's Prose and Poetical Works.

**COMPLETE IN ONE VOLUME, OCTAVO.**

Including two hundred and fifty Letters, and sundry Poems of Cowper, never before published in this country; and of Thomson a new and interesting Memoir, and upwards of twenty new Poems, for the first time printed from his own Manuscripts, taken from a late Edition of the Aldine Poets, now publishing in London.

**WITH SEVEN BEAUTIFUL ENGRAVINGS.**

The distinguished Professor Silliman, speaking of this edition, observes: "I am as much gratified by the elegance and fine taste of your edition, as by the noble tribute of genius and moral excellence which these delightful authors have left for all future generations; and Cowper, especially, is not less conspicuous as a true Christian, moralist and teacher, than as a poet of great power and exquisite taste."
THE POETICAL WORKS OF ROGERS, CAMPBELL, MONTGOMERY, LAMB, AND KIRKE WHITE.
COMPLETE IN ONE VOLUME, OCTAVO.
WITH SIX BEAUTIFUL ENGRAVINGS.
The beauty, correctness, and convenience of this favorite edition of these standard authors are so well known, that it is scarcely necessary to add a word in its favour. It is only necessary to say, that the publishers have now issued an illustrated edition, which greatly enhances its former value. The engravings are excellent and well selected. It is the best library edition extant.

CRABBE, HEBER, AND POLLOK'S POETICAL WORKS.
COMPLETE IN ONE VOLUME, OCTAVO.
WITH SIX BEAUTIFUL ENGRAVINGS.
A writer in the Boston Traveller holds the following language with reference to these valuable editions:

"Mr. Editor:—I wish, without any idea of puffing, to say a word or two upon the 'Library of English Poets' that is now published at Philadelphia, by Lippincott, Grambo & Co. It is certain, taking into consideration the elegant manner in which it is printed, and the reasonable price at which it is sold to purchasers, the best edition of the modern British Poets that has ever been published in this country. Each volume is an octavo of about 500 pages, double columns, stereotype, and accompanied with fine engravings and biographical sketches; and most of them are reprinted from Galignain's French edition. As to its value, we need only mention that it contains the entire works of Montgomery, Gray, Beattie, Collins, Byron, Cowper, Thomson, Milton, Young, Rogers, Campbell, Lamb, Heumann, Heber, Kirke White, Crabbe, the Miscellaneous Works of Goldsmith, and other masters of the lyre. The publishers are doing a great service by their publication, and their volumes are almost as great demand as the fashionable novels of the day; and they deserve to be so: for they are certainly printed in a style superior to that in which we have heretofore had the works of the English Poets."

No library can be considered complete without a copy of the above beautiful and cheap editions of the English Poets; and persons ordering all or any of them, will please say Lippincott, Grambo & Co.'s illustrated editions.

A COMPLETE
Dictionary of Poetical Quotations:
COMPRISING THE MOST EXCELLENT AND APPROPRIATE PASSAGES IN THE OLD BRITISH POETS; WITH CHOICE AND COPIOUS SELECTIONS FROM THE BEST MODERN BRITISH AND AMERICAN POETS.
EDITED BY SARAH JOSEPHA HALE.
As nightingales do upon glow-worms feed,
So poets live upon the living light
Of Nature and of Beauty.
Bailey's Patron.

Beautifully illustrated with Engravings. In one super-royal octavo volume, in various bindings.

The publishers extract, from the many highly complimentary notices of the above valuable and beautiful work, the following:

"We have at last a volume of Poetical Quotations worthy of the name. It contains nearly six hundred octavo pages, carefully and tastefully selected from all the home and foreign authors of celebrity. It is invaluable to a writer, while to the ordinary reader it presents every subject at a glance."—Cooke's Lady's Book.

"The plan or idea of Mrs. Hale's work is felicitous. It is one for which her fine taste, her orderly habits of mind, and her long occupation with literature, has given her peculiar facilities; and thoroughly has she accomplished her task in the work before us."—Saturn's Magazine.

"It is a choice collection of poetical extracts from every English and American author worth perusing, from the days of Chaucer to the present time."—Washington Union.

"There is nothing negative about this work; it is positively good."—Evening Bulletin.
LIPPINCOTT, GRAMBO & CO.'S PUBLICATIONS.

THE DIAMOND EDITION OF BYRON.

THE POETICAL WORKS OF LORD BYRON,
WITH A SKETCH OF HIS LIFE.

COMPLETE IN ONE NEAT DUODECIMO VOLUME, WITH STEEL PLATES.

The type of this edition is so perfect, and it is printed with so much care, on fine white paper, that it can be read with as much ease as most of the larger editions. This work is to be had in plain and superb binding, making a beautiful volume for a gift.

"The Poetical Works of Lord Byron, complete in one volume; published by L., G. & Co., Philadelphia. We hazard nothing in saying that, take it altogether, this is the most elegant work ever issued from the American press."  

"In a single volume, not larger than an ordinary duodecimo, the publishers have embraced the whole of Lord Byron's Poems, usually printed in ten or twelve volumes; and, what is more remarkable, have done it with a type so clear and distinct, that, notwithstanding its necessarily small size, it may be read with the utmost facility, even by failing eyes. The book is stereotyped; and never have we seen a finer specimen of that art. Everything about it is perfect—the paper, the printing, the binding, all correspondent with each other; and it is embellished with two fine engravings, well worthy the companionship in which they are placed."

"This will make a beautiful Christmas present."

"We extract the above from Godoy's Lady's Book. The notice itself, we are given to understand, is written by Mrs. Hale."

"We have to add our commendation in favour of this beautiful volume, a copy of which has been sent us by the publishers. The admirers of the noble bard will feel obliged to the enterprise which has prompted the publishers to dare a competition with the numerous editions of his works already in circulation; and we shall be surprised if this convenient travelling edition does not in a great degree supersede the use of the three octavo works, which have little advantage in size and openness of type, and are much inferior in the qualities of portability and lightness." — J. HITCHNER.

THE DIAMOND EDITION OF MOORE.
(CORRESPONDING WITH BYRON.)

THE POETICAL WORKS OF THOMAS MOORE,
COLLECTED BY HIMSELF.

COMPLETE IN ONE VOLUME.

This work is published uniform with Byron, from the last London edition, and is the most complete printed in the country.

THE DIAMOND EDITION OF SHAKESPEARE,
(COMPLETE IN ONE VOLUME)

INCLUDING A SKETCH OF HIS LIFE.

UNIFORM WITH BYRON AND MOORE.

THE ABOVE WORKS CAN BE HAD IN SEVERAL VARIETIES OF BINDING.

GOLDSMITH'S ANIMATED NATURE.

IN TWO VOLUMES, OCTAVO.

BEAUTIFULLY ILLUSTRATED WITH 385 PLATES.

CONTAINING A HISTORY OF THE EARTH, ANIMALS, BIRDS, AND FISHES; FORMING THE MOST COMPLETE NATURAL HISTORY EVER PUBLISHED.

This is a work that should be in the library of every family, having been written by one of the most talented authors in the English language.

"GoldsmitB can never be made obsolete while delicate genius, exquisite feeling, fine invention, the most harmonious metre, and the happiest diction, are at all valued."

BIGLAND'S NATURAL HISTORY.

THE POWER AND PROGRESS OF THE UNITED STATES.

THE UNITED STATES; Its Power and Progress.

BY GUILLAUME TELL POUSIN,

LATE MINISTER OF THE REPUBLIC OF FRANCE TO THE UNITED STATES.

FIRST AMERICAN, FROM THE THIRD PARIS EDITION.

SURGEON U. S. NAVY.

In one large octavo volume.

SCHOOLCRAFT'S GREAT NATIONAL WORK ON THE INDIAN TRIBES OF THE UNITED STATES.

WITH BEAUTIFUL AND ACCURATE COLOURED ILLUSTRATIONS.

HISTORICAL AND STATISTICAL INFORMATION RESPECTING THE HISTORY, CONDITION AND PROSPECTS OF THE Indian Tribes of the United States.

COLLECTED AND PREPARED UNDER THE DIRECTION OF THE BUREAU OF INDIAN AFFAIRS, PER ACT OF MARCH 3, 1847.

BY HENRY R. SCHOOLCRAFT, LL.D.

ILLUSTRATED BY S. EASTMAN, CAPT. U. S. A.

PUBLISHED BY AUTHORITY OF CONGRESS.

THE AMERICAN GARDENER'S CALENDAR,

ADAPTED TO THE CLIMATE AND SEASONS OF THE UNITED STATES.

Containing a complete account of all the work necessary to be done in the Kitchen Garden, Fruit Garden, Orchard, Vineyard, Nursery, Pleasure-Ground, Flower Garden, Green-house, Hot-house, and Forcing Frames, for every month in the year; with ample Practical Directions for performing the same.

Also, general as well as minute instructions for laying out or erecting each and every of the above departments, according to modern taste and the most approved plans; the Ornamental Planting of Pleasure Grounds, in the ancient and modern style; the cultivation of Thorn Quicks, and other plants suitable for Live Hedges, with the best methods of making them, &c. To which are annexed catalogues of Kitchen Garden Plants and Herbs: Aromatic, Pot, and Sweet Herbs; Medicinal Plants, and the most important Grapes, &c., used in rural economy; with the soil best adapted to their cultivation. Together with a copious Index to the body of the work.

BY BERNARD M'MAHON.

THE PORTFOLIO OF A SOUTHERN MEDICAL STUDENT.

BY GEORGE M. WHARTON, M. D.

WITH NUMEROUS ILLUSTRATIONS BY CROOME.

One volume, 12mo.
LIPPINCOTT, GRAMBO & CO.'S PUBLICATIONS.

THE FARMER’S AND PLANTER’S ENCYCLOPÆDIA.

The Farmer’s and Planter’s Encyclopaedia of Rural Affairs.
BY CUTHBERT W. JOHNSON.
ADAPTED TO THE UNITED STATES BY GOUVERNEUR EMERSON.

Illustrated by seventeen beautiful Engravings of Cattle, Horses, Sheep, the varieties of Wheat, Barley, Oats, Grasses, the Weeds of Agriculture, &c.; besides numerous Engravings on wood of the most important implements of Agriculture, &c.

This standard work contains the latest and best information upon all subjects connected with farming, and appertaining to the country; treating of the great crops of grain, hay, cotton, hemp, tobacco, rice, sugar, &c. &c.; of horses and mules; of cattle, with minute particulars relating to cheese and butter-making; of birds, including a description of capon-making, with drawings of the instruments employed; of bees, and the Russian and other systems of mammaing bees and constructing hives. Long articles on the uses and preparation of bones, lime, guano, and all sorts of animal, mineral, and vegetable substances employed as manures. Descriptions of the most approved ploughs, harrows, threshers, and every other agricultural machine and implement; of fruit and shade trees, forest trees, and shrubs; of weeds, and all kinds of flies, and destructive worms and insects, and the best means of getting rid of them; together with a thousand other matters relating to rural life, about which information is so constantly desired by all residents of the country.

IN ONE LARGE OCTAVO VOLUME.

MASON’S FARRIER—FARMERS’ EDITION.
Price, 62 cents.

THE PRACTICAL FARRIER, FOR FARMERS:
COMPRISING A GENERAL DESCRIPTION OF THE NOBLE AND USEFUL ANIMAL
THE HORSE;
WITH MODES OF MANAGEMENT IN ALL CASES, AND TREATMENT IN DISEASE.
TO WHICH IS ADDED,
A PRIZE ESSAY ON MULES; AND AN APPENDIX,
Containing Recipes for Diseases of Horses, Oxen, Cows, Calves, Sheep, Dogs, Swine, &c. &c.

BY RICHARD MASON, M. D.,
Formerly of Surry County, Virginia.
In one volume, 12mo.; bound in cloth, gilt.

MASON’S FARRIER AND STUD-BOOK—NEW EDITION.

THE GENTLEMAN’S NEW POCKET FARRIER:
COMPRISING A GENERAL DESCRIPTION OF THE NOBLE AND USEFUL FARRIER:
THE HORSE;
WITH MODES OF MANAGEMENT IN ALL CASES, AND TREATMENT IN DISEASE.

BY RICHARD MASON, M. D.,
Formerly of Surry County, Virginia.
To which is added, A PRIZE ESSAY ON MULES; and an APPENDIX, containing Recipes for Diseases of Mares, Oxen, Cows, Calves, Sheep, Dogs, Swine, &c. &c.; with Annals of the Turf, American Stud-Book, Rules for Trotting, Racing, &c.

WITH A SUPPLEMENT,
Comprising an Essay on Domestic Animals, especially the Horse; with Remarks on Treatment and Breeding; together with Trotting and Racing Tables, showing the best time on record at one, two, three and four mile heats; Pedigrees of Winning Horses, since 1839, and of the most celebrated Stallions and Mares; with useful Calving and Lambing Tables. By J. S. SKINNER, Editor now of the Farmer’s Library, New York, &c. &c.
LIPPINCOTT, GRAMBO & CO.'S PUBLICATIONS.

HINDS'S FARRIERY AND STUD-BOOK—NEW EDITION.

FARRIERY,
TAUGHT ON A NEW AND EASY PLAN:

A Treatise on the Diseases and Accidents of the Horse;
With Instructions to the Shoeing Smith, Farmer, and Groom; preceded by a Popular Description of the Animal Functions in Health, and how these are to be restored when disordered.

BY JOHN HINDS, VETERINARY SURGEON.

We have received numerous flattering notices of the great practical value of these works. The distinguished editor of the American Farmer, speaking of them, observes:—"We cannot too highly recommend these books, and therefore advise every owner of a horse to obtain them."

"There are receipts in those books that show how Funder may be cured, and the traveller pursue his journey the next day, by giving a tablespoonful of alum. This was not from Dr. F. Thornton, of Montpelier, Rappahannock county, Virginia, as founded on his own observation in several cases."

"The constant demand for Mason's and Hinds's Farmer has induced the publishers, Messrs. Lippincott, Grambo & Co., to put forth new editions, with a 'Supplement' of 100 pages, by J. S. Skinner, Esq. We should have sought to render an acceptable service to our agricultural readers, by giving a chapter from the Supplement, 'On the Relations between Man and the Domestic Animals, especially the Horse, and the Obligations they impose;' or the one on 'The Form of Animals;' but that either one of them would overrun the space here allotted to such subjects."

"Lists of Medicines, and other articles which ought to be at hand about every farm and during stable, and every farmer's and breeder's establishment, will be found in these valuable works."

TO CARPENTERS AND MECHANICS.

Just Published.

A NEW AND IMPROVED EDITION OF

THE CARPENTER'S NEW GUIDE,
BEING A COMPLETE BOOK OF LINES FOR

CARPENTRY AND JOINERY;
Treating fully on Practical Geometry, Saff's Brick and Plaster Groves, Niches of every description, Sky-rights, Ledges for Roofs and Domes; with a great variety of Designs for Roofs, Trussed Girders, Floors, Domes, Bridges, &c., Angle Bars for Shop Fronts, &c., and Raking Mouldings.

ALSO,
Additional Plans for various Stair-Cases, with the Lines for producing the Face and Falling Mens, never before published, and greatly superior to those given in a former edition of this work.

BY WILLIAM JOHNSON, ARCHITECT,
OF PHILADELPHIA.

The whole founded on true Geometrical Principles; the Theory and Practice well explained and fully exemplified, on eighty-three copper plates, including some Observations and Calculations on the Strength of Timber.

BY PETER NICHOLSON,
Author of "The Carpenter and Joiner's Assistant," "The Student's Instructor to the Five Orders," &c.

Thirteenth Edition. One volume, 4to., well bound.
LIPPINCOTT, GRAMBO & CO.'S PUBLICATIONS.

A DICTIONARY OF SELECT AND POPULAR QUOTATIONS, WHICH ARE IN DAILY USE.
TAKEN FROM THE LATIN, FRENCH, GREEK, SPANISH AND ITALIAN LANGUAGES.
Together with a copious Collection of Law Maxims and Law Terms, translated into English, with Illustrations, Historical and Idiomatic.

NEW AMERICAN EDITION, CORRECTED, WITH ADDITIONS.
One volume, 12mo.

This volume comprises a copious collection of legal and other terms which are in common use, with English translations and historical illustrations; and we should judge its author had surely been to a great "Feast of Languages," and stole all the scraps. A work of this character should have an extensive sale, as it entirely obviates a serious difficulty in which most readers are involved by the frequent occurrence of Latin, Greek, and French passages, which we suppose are introduced by authors for a mere show of learning—a difficulty very perplexing to readers in general. This "Dictionary of Quotations," however, which too much cannot be said in its favour, effectually removes the difficulty, and gives the reader an advantage over the author; for we believe a majority are themselves ignorant of the meaning of the terms they employ. Very few truly learned authors will insult their readers by introducing Latin or French quotations in their writings, when "plain English" will do as well; but we will not enlarge on this point.

If the book is useful to those unacquainted with other languages, it is no less valuable to the classically educated as a book of reference, and answers all the purposes of a Lexicon—indeed, on many accounts, it is better. It saves the trouble of tumbling over the larger volumes, to which every one, and especially those engaged in the legal profession, are very often subjected. It should have a place in every library in the country.

RUSCHENBERGER'S NATURAL HISTORY,
COMPLETE, WITH NEW GLOSSARY.

The Elements of Natural History,
EMBRACING ZOOLOGY, BOTANY AND GEOLOGY:
FOR SCHOOLS, COLLEGES AND FAMILIES.
BY W. S. W. RUSCHENBERGER, M.D.
IN TWO VOLUMES.
WITH NEARLY ONE THOUSAND ILLUSTRATIONS, AND A COPIOUS GLOSSARY.

A Beautiful and Valuable Presentation Book.

THE POET'S OFFERING.
EDITED BY MRS. HALE.

With a Portrait of the Editor, a Splendid Illustrated Title-Page, and Twelve Beautiful Engravings by Sartain. Bound in rich Turkey Morocco, and Extra Cloth, Gilt Edge.

To those who wish to make a present that will never lose its value, this will be found the most desirable Gift-Book ever published.

"We commend it to all who desire to present a friend with a volume not only very beautiful, but of solid intrinsic value."—Washington Union.

"A perfect treasury of the thoughts and fancies of the best English and American Poets. The poems and proverbs are beautiful, and the leading rich, elegant, and substantial, the most sublime and attractive of all the elegant gift-books we have seen."—Evening Bulletin.

"The publishers deserve the thanks of the public for so happy a thought; so well executed. The engravings are by the best artists, and the other portions of the work correspond in elegance."—Public Ledger.

"There is no book of selections so diversified and appropriate within our knowledge."—Pamphlet.

"It is one of the most valuable as well as elegant books ever published in this country."—Girard's Lady's Lock.

"It is the most beautiful and the most useful offering ever bestowed on the public. No individual of literary taste will venture to be without it."—The City Item.

15
LIPPINCOTT, GRAMBO & CO.'S PUBLICATIONS.

THE YOUNG DOMINICAN;
OR, THE MYSTERIES OF THE INQUISITION,
AND OTHER SECRET SOCIETIES OF SPAIN.
BY M. V. DE FEREAL.
WITH HISTORICAL NOTES, BY M. MANUEL DE CUENDIAS,
TRANSLATED FROM THE FRENCH.
ILLUSTRATED WITH TWENTY SPLENDID ENGRAVINGS BY FRENCH ARTISTS.
One volume, octavo.

SAY'S POLITICAL ECONOMY.

A TREATISE ON POLITICAL ECONOMY;
Or, The Production, Distribution and Consumption of Wealth.
BY JEAN BAPTISTE SAY.
FIFTH AMERICAN EDITION, WITH ADDITIONAL NOTES,
BY C. C. BIDDLE, Esq.
In one volume, octavo.

It would be beneficial to our country if all those who are aspiring to office, were required by their constituents to be familiar with the pages of Say. The distinguished biographer of the author, in noticing this work, observes: "Happily for science, he commenced that study which forms the basis of his admirable Treatise on Political Economy; a work which not only improved under his hand with every successive edition, but has been translated into most of the European languages."

The Editor of the North American Review, speaking of Say, observes, that "he is the most popular, and perhaps the most able writer on Political Economy, since the time of Smith."

LAURENCE STERNE'S WORKS,
WITH A LIFE OF THE AUTHOR:
WRITTEN BY HIMSELF.
WITH SEVEN BEAUTIFUL ILLUSTRATIONS, ENGRAVED BY GILBERT AND GIHON,
FROM DESIGNS BY DARLEY.
One volume, octavo; cloth, gilt.

To commend or to criticise Sterne's Works, in this age of the world, would be all "wasteful and extravagant excess." Uncle Toby—Corporal Trim—the Widow—Le Fevre—Poor Maria—the Captive—even the Dead Ass,—this is all we have to say of Sterne; and in the memory of these characters, histories, and sketches, a thousand follies and worse than follies are forgotten. The volume is a very handsome one.

THE MEXICAN WAR AND ITS HEROES;
BEING
A COMPLETE HISTORY OF THE MEXICAN WAR,
EMBRACING ALL THE OPERATIONS UNDER GENERALS TAYLOR AND SCOTT.
WITH A BIOGRAPHY OF THE OFFICERS.
ALSO,
AN ACCOUNT OF THE CONQUEST OF CALIFORNIA AND NEW MEXICO,
In one volume, 12mo.
LIPPINCOTT, GRAMBO & CO.'S PUBLICATIONS.

NEW AND COMPLETE COOK-BOOK.

THE PRACTICAL COOK-BOOK,
CONTAINING UPWARDS OF
ONE THOUSAND RECEIPTS,
Consisting of Directions for Selecting, Preparing, and Cooking all kinds of Meats, Fish, Poultry, and Game; Soups, Broths, Vegetables, and Salads. Also, for making all kinds of Plain and Fancy Breads, Pastes, Padouces, Cakes, Creams, Ices, Jellies, Preserves, Marmalades, &c. &c. &c. Together with various Miscellaneous Recipes, and numerous Preparations for Invalids.

BY MRS. BLISS.
In one volume, 12mo.

The City Merchant; or, The Mysterious Failure.

BY J. B. JOH.
AUTHOR OF "WILD WESTERN SCENES," "THE WEST." "CHANT," &c.
ILLUSTRATED WITH TEN ENGRAVINGS.
In one volume, 12mo.

CALIFORNIA AND OREGON;
OR, SIGHTS IN THE GOLD REGION, AND SCENES BY THE WAY.

BY THEODORE T. JOHNSON.
WITH NOTES, BY HON. SAMUEL R. THURSTON,
Delegate to Congress from that Territory.
With numerous Plates and Maps.

AUNT PHILLIS'S CABIN;
OR, SOUTHERN LIFE AS IT IS.

BY MRS. MARY H. EASTMAN.

PRICE, 50 AND 75 CENTS.

This volume presents a picture of Southern Life, taken at different points of view from the one occupied by the authoress of "Uncle Tom's Cabin." The writer, being a native of the South, is familiar with the many varied aspects assumed by domestic servitude in that sunny region, and therefore feels competent to give pictures of "Southern Life, as it is."
Pledged to no clique or party, and free from the pressure of any and all extraneous influences, she has written her book with a view to its truthfulness; and the public at the North, as well as at the South, will find in "Aunt Phillis's Cabin" not the distorted picture of an interested painter, but the faithful transcript of a Daguerreocypist.

WHAT IS CHURCH HISTORY?
A VINDICATION OF THE IDEA OF HISTORICAL DEVELOPMENTS,

BY PHILIP SCHAF.
TRANSLATED FROM THE GERMAN.
In one volume, 12mo.
LIPINCOTT, GRAMBO & CO.'S PUBLICATIONS.

DODD'S LECTURES.

DISCOURSES TO YOUNG MEN.
ILLUSTRATED BY NUMEROUS HIGHLY INTERESTING ANECDOTES.

BY WILLIAM DODD, LL.D.,

CHAPLAIN IN ORDINARY TO HIS MAJESTY GEORGE THE THIRD.

FIRST AMERICAN EDITION, WITH ENGRAVINGS.

One volume, 18mo.

THE IRIS:
AN ORIGINAL SOUVENIR.

With Contributions from the First Writers in the Country.

EDITED BY PROF. JOHN S. HART.

With Splendid Illuminations and Steel Engravings. Bound in Turkey Morocco and rich Papier Mache Binding.

IN ONE VOLUME, OCTAVO.

Its contents are entirely original. Among the contributors are names well known in the republic of letters; such as Mr. Boker, Mr. Stoddard, Prof. Moffat, Edith May, Mrs. Sigourney, Caroline May, Mrs. Kinney, Mrs. Butler, Mrs. Pease, Mrs. Swift, Mr. Van Bibber, Rev. Charles T. Brooks, Mrs. Dorr, Erastus W. Ellsworth, Miss E. W. Barnes, Mrs. Williams, Mary Young, Dr. Gardette, Alice Carey, Phebe Carey, Augusta Browne, Hamilton Browne, Caroline Eustis, Margaret Junkin, Maria J. B. Browne, Miss Starr, Mrs. Brotherson, Kate Campbell, &c.

Gems from the Sacred Vine;
OR, HOLY THOUGHTS UPON SACRED SUBJECTS.

BY CLERGYMEN OF THE EPISCOPAL CHURCH.

EDITED BY THOMAS WYATT, A.M.

In one volume, 12mo.

WITH SEVEN BEAUTIFUL STEEL ENGRAVINGS.

The contents of this work are chiefly by clergymen of the Episcopal Church. Among the contributors will be found the names of the Right Rev. Bishop Potter, Bishop Hopkins, Bishop Smith, Bishop Johns, and Bishop Doane; and the Rev. Drs. H. V. D. Johns, Coleman, and Butler; Rev. G. T. Bedell, McCabe, Orgilshy, &c. The illustrations are rich and exquisitely wrought engravings upon the following subjects:—"Samuel before Eli," "Peter and John healing the Lame Man," "The Resurrection of Christ," "Joseph sold by his Brethren," "The Tables of the Law," "Christ's Agony in the Garden," and "The Flight into Egypt." These subjects, with many others in prose and verse, are ably treated throughout the work.

ANCIENT CHRISTIANITY EXEMPLIFIED,

In the Private, Domestic, Social, and Civil Life of the Primitive Christians, and in the Original Institutions, Offices, Ordinances, and Rites of the Church.

BY REV. LYMAN COLEMAN, D.D.

In one volume 8vo, Price $2 50.
LONZ POWERS; Or, The Regulators.
A ROMANCE OF KENTUCKY.
FOUNDED ON FACTS.
BY JAMES WEIR, ESQ.
IN TWO VOLUMES.

The scenes, characters, and incidents in these volumes have been copied from nature, and from real life. They are represented as taking place at that period in the history of Kentucky, when the Indian, driven, after many a hard-fought field, from his favourite hunting-ground, was succeeded by a rude and unlettered population, interspersed with organized bands of desperadoes, scarcely less savage than the red men they had displaced. The author possesses a vigorous and graphic pen, and has produced a very interesting romance, which gives us a striking portrait of the times he describes.

A PRACTICAL TREATISE ON BUSINESS;
OR, HOW TO GET, SAVE, SPEND, GIVE, LEND, AND BEQUEATH MONEY: WITH AN INQUIRY INTO THE CHANCES OF SUCCESS AND CAUSES OF FAILURE IN BUSINESS.
BY EDWIN T. FREEDLY.

Also, Prize Essays, Statistics, Miscellanies, and numerous private letters from successful and distinguished business men.
12mo., cloth. Price One Dollar.

The object of this treatise is fourfold. First, the elevation of the business character, and to define clearly the limits within which it is not only proper but obligatory to get money. Secondly, to lay down the principles which must be observed to insure success, and what must be avoided to escape failure. Thirdly, to give the mode of management in certain prominent pursuits adopted by the most successful, from which men in all kinds of business may derive profitable hints. Fourthly, to afford a work of solid interest to those who read without expectation of pecuniary benefit.

A MANUAL OF POLITENESS,
COMPRISING THE PRINCIPLES OF ETIQUETTE AND RULES OF BEHAVIOUR IN GENTEEL SOCIETY, FOR PERSONS OF BOTH SEXES.
18mo., with Plates.

Book of Politeness.

THE GENTLEMAN AND LADY'S BOOK OF POLITENESS AND PROPRIETY OF DEPORTMENT. DEDICATED TO THE YOUTH OF BOTH SEXES.
BY MADAME CELNART.
Translated from the Sixth Paris Edition, Enlarged and Improved.
FIFTH AMERICAN EDITION.
One volume, 18mo.

THE ANTEDILUVIANS; Or, The World Destroyed.
A NARRATIVE POEM, IN TEN BOOKS.
BY JAMES M'HENRY, M.D.
One volume, 18mo.
Bennett's (Rev. John) Letters to a Young Lady,
ON A VARIETY OF SUBJECTS CALCULATED TO IMPROVE THE HEART,
TO FORM THE MANNERS, AND ENLIGHTEN THE UNDERSTANDING.

"That our daughters may be as polished corners of the temple."

The publishers sincerely hope (for the happiness of mankind) that a copy of this valuable little work will be found the companion of every young lady, as much of the happiness of every family depends on the proper cultivation of the female mind.

THE DAUGHTER'S OWN BOOK:
OR, PRACTICAL HINTS FROM A FATHER TO HIS DAUGHTER.
One volume, 18mo.

This is one of the most practical and truly valuable treatises on the culture and discipline of the female mind, which has hitherto been published in this country; and the publishers are very confident, from the great demand for this invaluable little work, that ere long it will be found in the library of every young lady.

THE AMERICAN CHESTERFIELD:

CONTAINING ALSO A COMPLETE TREATISE ON THE ART OF CARVING.

"We most cordially recommend the American Chesterfield to general attention; but to young persons particularly, as one of the best works of the kind that has ever been published in this country. It cannot be too highly appreciated, nor its perusal be unproductive of satisfaction and usefulness."

SENECA'S MORALS.
BY WAY OF ABSTRACT TO WHICH IS ADDED, A DISCOURSE UNDER THE TITLE OF AN AFTER-THOUGHT.
BY SIR ROGER L'ESTRANGE, KNT.
A new, fine edition; one volume, 18mo.

A copy of this valuable little work should be found in every family library.

NEW SONG-BOOK.
Grigg's Southern and Western Songster;
BEING A CHOICE COLLECTION OF THE MOST FASHIONABLE SONGS, MANY OF WHICH ARE ORIGINAL.
In one volume, 18mo.

Great care was taken, in the selection, to admit no song that contained, in the slightest degree, any indelicate or improper allusions; and with great propriety it may claim the title of "The Parlour Song-Book, or Songster." The immortal Shakespeare observes —

"The man that hath not music in himself,
Nor is not moved with concord of sweet sounds,
is fit for treasons, stratagems, and spoils."

ROBOTHAM'S POCKET FRENCH DICTIONARY,
CAREFULLY REVISED,
AND THE PRONUNCIATION OF ALL THE DIFFICULT WORDS ADDED.
THE LIFE AND OPINIONS OF TRISTRAM SHANDY, GENTLEMAN.
COMPRISING THE HUMOROUS ADVENTURES OF
UNCLE TOBY AND CORPORAL TRIM.
BY L. STERNE.
Beautifully Illustrated by Darley. Stitched.

A SENTIMENTAL JOURNEY.
BY L. STERNE.
Illustrated as above by Darley. Stitched.
The beauties of this author are so well known, and his errors in style and expression so few and far between, that one reads with renewed delight his delicate turns, &c.

THE LIFE OF GENERAL JACKSON,
WITH A LIKENESS OF THE OLD HERO.
One volume, 18mo.

LIFE OF PAUL JONES.
In one volume, 12mo.
WITH ONE HUNDRED ILLUSTRATIONS.
BY JAMES HAMILTON.
The work is compiled from his original journals and correspondence, and includes an account of his services in the American Revolution, and in the war between the Russians and Turks in the Black Sea. There is scarcely any Naval hero, of any age, who combined in his character so much of the adventurous, skilful and daring, as Paul Jones. The incidents of his life are almost as startling and absorbing as those of romance. His achievements during the American Revolution—the fight between the Bon Homme Richard and Serapis, the most desperate naval action on record—and the alarm into which, with so small a force, he threw the coasts of England and Scotland—are matters comparatively well known to Americans; but the incidents of his subsequent career have been veiled in obscurity, which is dispelled by this biography. A book like this, narrating the actions of such a man, ought to meet with an extensive sale, and become as popular as Robinson Crusoe in fiction, or Weems's Life of Marion and Washington, and similar books, in fact. It contains 400 pages, has a handsome portrait and medallion likeness of Jones, and is illustrated with numerous original wood engravings of naval scenes and distinguished men with whom he was familiar.

THE GREEK EXILE;
Or, A Narrative of the Captivity and Escape of Christophorus Plato Castanisl,
DURING THE MASSACRE ON THE ISLAND OF SCIO BY THE TURKS.

THE PRINCIPLES OF MECHANICS APPLIED TO MACHINERY

Of American models, Steam-Engines, Water-Works, Navigation, Bridge-building, &c. &c. By FREDERICK OVERMAN,

Author of "The Manufacture of Iron," and other scientific treatises.

Illustrated by 150 Engravings. In one large 12mo. volume.

WILLIAM'S TRAVELLER'S AND TOURIST'S GUIDE

Through the United States, Canada, &c.

This book will be found replete with information, not only to the traveller, but likewise to the man of business. In its preparation, an entirely new plan has been adopted, which, we are convinced, needs only a trial to be fully appreciated.

Among its many valuable features, are tables showing at a glance the distances, forms, and time occupied in travelling from the principal cities to the most important places in the Union; so that the question frequently asked, without obtaining a satisfactory reply, is here answered in full. Other tables show the distances from New York, &c., to domestic and foreign ports, by sea; and also, by way of comparison, from New York and Liverpool to the principal ports beyond and around Cape Horn, &c., as well as from the Isthmus of Panama. Accompanied by a large and accurate Map of the United States, including a separate Map of California, Oregon, New Mexico and Utah. Also, a Map of the Island of Cuba, and Plan of the City and Harbor of Havana; and a Map of Niagara River and Falls.

THE LEGISLATIVE GUIDE:

Containing directions for conducting business in the House of Representatives; the Senate of the United States; the Joint Rules of both Houses; a Synopsis of Jefferson's Manual, and copious Indices; together with a concise system of Rules of Order, based on the regulations of the U. S. Congress. Designed to economise time, secure uniformity and despatch in conducting business in all secular meetings, and also in all religious, political, and Legislative Assemblies.

BY JOSEPH BARTLETT BURLEIGH, LL. D.

In one volume, 12mo.

This is considered by our Judges and Congressmen as decidedly the best work of the kind extant. Every young man in the country should have a copy of this book.

THE INITIALS; A Story of Modern Life.

THREE VOLUMES OF THE LONDON EDITION COMPLETE IN ONE VOLUME 12MO.

A new novel, equal to "Jane Eyre."

WILD WESTERN SCENES:

A NARRATIVE OF ADVENTURES IN THE WESTERN WILDERNESS,

Wherein the Exploits of Daniel Boone, the Great American Pioneer, are particularly described. Also, Minute Accounts of Bear, Deer, and Buffalo Hunts—Desperate Conflicts with the Savages—Fishing and Fowling Adventures—Encounters with Serpents, &c.

BY LUKE SHORFF ELD, Author of "The Western Merchant."

BEAUTIFULLY ILLUSTRATED. One volume, 12mo.

Engraved in the first style of the art, from Drawings by Captain Eastman, U.S.A.
PRICE, FIFTEEN DOLLARS.

COCKBURN’S LIFE OF LORD JEFFREY,
WITH A SELECTION FROM HIS CORRESPONDENCE,
BY LORD COCKBURN,
One of the Judges of the Court of Sessions in Scotland. Two volumes, demi-octavo.

"Those who know Lord Jeffrey only through the pages of the Edinburgh Review, get but a one-sided, and not the most pleasant view of his character."

"We advise our readers to obtain the book, and enjoy it to the full themselves. They will unite with us in saying that the self-drawn character portrayed in the letters of Lord Jeffrey, is one of the most delightful pictures that has ever been presented to them."—Evening Bulletin.

Jeffrey was for a long period editor of the Review, and was admitted by all the other contributors to be the leading spirit in it. In addition to his political articles, he soon showed his wonderful powers of criticism in literature. He was equally at home whether censuring or applauding: in his onslaughts on the mediocrity of Southey, or the misused talents of Byron, or in his noble essays on Shakespeare, or Scott, or Burns."—New York Express.

PRICE, TWO DOLLARS AND A HALF.

ROMANCE OF NATURAL HISTORY;
OR, WILD SCENES AND WILD HUNTERS.
WITH NUMEROUS ILLUSTRATIONS, IN ONE VOLUME OCTAVO, CLOTH.
BY C. W. WEBBER.

"We have rarely read a volume so full of life and enthusiasm, so capable of transporting the reader into an actor among the scenes and persons described. The volume can hardly be opened at any page without arresting the attention, and the reader is borne along with the movement of a style whose elastic spring and life knows no weariness."—Boston Courier and Transcript.

PRICE, TWO DOLLARS.

THE LIFE OF WILLIAM PENN,
WITH SELECTIONS FROM HIS CORRESPONDENCE AND AUTOBIOGRAPHY,
BY SAMUEL M. JANNEY.

"Our author has acquitted himself in a manner worthy of his subject. His style is easy, flowing, and yet sententious. Altogether, we consider it a highly valuable addition to the literature of our age, and a work that should find its way into the library of every Friend."—Friends’ Intelligencer, Philadelphia.

"We regard this life of the great founder of Pennsylvania as a valuable addition to the literature of the country."—Philadelphia Evening Bulletin.

"We have no hesitation in pronouncing Mr. Janney’s life of Penn the best, because the most satisfactory, that has yet been written. The author’s style is clear and uninvolved, and well suited to the purposes of biographical narrative."—Louisville Journal.

PRICE, TWO DOLLARS.
Thus they made their way almost always, and while the others trampled over them, the sacred shrub; this being the last thing they would have done, their presence was felt even in these places of observation. They held that the Church of this age was, and whether Christians—both pastors and people—are doing their duty. Our author believes not, and, to our mind, he has made out a strong case. He thinks there is abundant room for reform at the present time, and that it is needed almost as much as in the days of Luther. And why? Because, in his own words, "While one portion of nominal Christians have busied themselves with forms and ceremonies and observances; with pictures, images, and processions; others have given to doctrines the supremacy, and have busied themselves in laying down the lines by which to enforce human belief—lines of interpretation by which to control human opinion—lines of discipline and restraint, by which to bring human minds to uniformity of faith and action. They have formed creeds and catechisms; they have spread themselves over the whole field of the sacred writings, and scratched up all the surface; they have gathered all the straws, and turned over all the pebbles, and detected the colour and determined the outline of every stone and tree and shrub; they have dwelt with rapture upon all that was beautiful and sublime; but they have trampled over mines of golden wisdom, of surpassing richness and depth, almost without a thought, and almost without an effort to fathom these priceless treasures, much less to take possession of them."
TALES OF THE SOUTHERN BORDER.
BY C. W. WEBBER.
ONE VOLUME OCTAVO, HANSDOMELY ILLUSTRATED.

The Hunter Naturalist, a Romance of Sporting;
OR, WILD SCENES AND WILD HUNTERS,
BY C. W. WEBBER,

The Footpath and Highway;

OR,

WANDERINGS OF AN AMERICAN IN GREAT BRITAIN,

IN 1851 AND '52.

BY BENJAMIN MORAN.

This volume embodies the observations of the author, made during eight months' wanderings, as a correspondent for American Journals; and as he travelled much on foot, differs essentially from those on the same countries, by other writers. The habits, manners, customs, and condition of the people have been carefully noted, and his views of them are given in clear, bold language. His remarks take a wide range, and as he visited every county in England but three, there will be much in the work of a novel and instructive character.

One vol. 12mo. Price $1 25.

DAY DREAMS.

HINDS'S FARRIERY AND STUD-BOOK—NEW EDITION.

FARRIERY,
TAUGHT ON A NEW AND EASY PLAN:
BEING
A CURE IN THE DISEASES AND ACCIDENTS OF THE HORSE;
With Instructions to the Shoeing Smith, Farrier, and Groom; preceded by a Popular Description of the Animal. Functions in Health, and how these are to be restored when disordered.

BY JOHN HINDS, VETERINARY SURGEON.
With considerable Additions and Improvements, particularly adapted to this country,
BY THOMAS M. SMITH,
Veterinary Surgeon, and Member of the London Veterinary Medical Society.

WITh A SUPPLEMENT, BY J. S. SKINNER.
The publishers have received numerous flattering notices of the great practical value of these works. The distinguished editor of the American Farmer, speaking of them, observes:—"We cannot too highly recommend these books, and therefore advise every owner of a horse to obtain them."

"There are receipts in those books that show how Founder may be cured, and the traveller pursue his journey the next day, by giving a tablespoonful of alum. This was put from Dr. P. Thornton, of Montgomery, Rappahannock County, Virginia, as founded on his own observation in several cases."

"The constant demand for Mason's and Hinds's Farrier has induced the publishers, Messrs. Lippincott, Grambo & Co., to put forth new editions, with a 'Supplement' of 100 pages, by J. S. Skinner, Esq. We should have sought to render an acceptable service to our agricultural readers, by giving a chapter from the Supplement, 'On the Relations between Man and the Domestic Animals, especially the Horse, and the Observations they impose;' or the one on "The Form of Animals;' but that neither one of them would overrun the space here allotted to such subjects."

"Lists of Medicines, and other articles which ought to be at hand about every training and livery stable, and every Farmer's and Breeder's establishment, will be found in these valuable works."

TO CARPENTERS AND MECHANICS.
Just Published.

A NEW AND IMPROVED EDITION OF
THE CARPENTER'S NEW GUIDE,
BEING A COMPLETE BOOK OF LINES FOR
CARPENTRY AND JOINERY;
Treating fully on Practical Geometry, Saffier's Brick and Plaster Grooves, Niches of every description, Sky-lights, Lines for Roofs and Domes; with a great variety of Designs for Roofs, Trussed Girders, Floors, Domes, Bridges, &c. Angle Bars for Shop Fronts, &c., and Raking Mouldings.

ALSO,
Additional Plans for various Stair-Cases, with the Lines for producing the Face and Falling Molds, never before published, and greatly superior to those given in a former edition of this work.

BY WILLIAM JOHNSON, ARCHITECT,
OF PHILADELPHIA.
The whole founded on true Geometrical Principles; the Theory and Practice well explained and fully exemplified, on eighty-three copper plates, including some Observations and Calculations on the Strength of Timber.

BY PETER NICHOLSON,
Author of "The Carpenter and Joiner's Assistant," "The Student's Instructor to the Five Orders," &c.

Thirteenth Edition. One volume, 4to., well bound.

14
